Index to volume 45

Author index*

A

ADAMS, M. S. (*See* VANSELOW, N. A., et al.), 302
ADDINGTON, W. W. (*See* FERGUSON, A., et al.), *42* (Abst.)
ADELSTEIN, A. M. (*See* INMAN and ADELSTEIN), *2* (Abst.)
ADOLPHSON, R. L., and TOWNLEY, R. G., 119 (Abst.)
—. (*See* TOWNLEY, R. G., et al.), 118 (Abst.)
AHO, K. (*See* LEIKOLA and AHO), *26* (Abst.)
ALBERTO, R. (*See* LYMAN, M., et al.), 129 (Abst.)
ALDRETE, J. A., and JOHNSON, D. A., *12* (Abst.)
AMER, N. S. (*See* KAHN and AMER), *42* (Abst.)
AMEZCUA, J. (*See* MASSELL, B. F., et al.), *8* (Abst.)
AMMANN, A. J., CAIN, W. A., ISHIZAKA, K., HONG, R., and GOOD, R. A., *22* (Abst.)
ANAND, S. C. (*See* ITKIN and ANAND), 178
ANDERSON, L. B., JR., DREYFUSS, E. M., LOGAN, J., JOHNSTONE, D. E., and GLASER, J., 310
ANDRADA, E. C. (*See* ANDRADA, J. A., et al.), *31* (Abst.)
ANDRADA, J. A., ROSE, N. R., and ANDRADA, E. C., *31* (Abst.)
ANGLETON, G. M. (*See* WANDERER, A. A., et al.), 127 (Abst.)
DE ARAUJO, G., DUDLEY, D. L., and VANARSDEL, P. P., JR., 130 (Abst.)
ARBESMAN, C. E., TSE, K. S., and WICHER, K., 106 (Abst.)
—. (*See* DOLOVICH, J., et al.), 286
—. (*See* HOUSER, D. D., et al.), 121 (Abst.)
—. (*See* HUGHES, W. F., et al.), *16* (Abst.); 132 (Abst.)
—. (*See* ITO, K., et al.), 123 (Abst.)
—. (*See* TSE, K. S., et al.), 106 (Abst.)
—. (*See* WICHER, K., et al.), 107 (Abst.)
AREY, J. B. (*See* NAIMAN, J. L., et al.), *24* (Abst.)
ARQUEMBOURG, P. (*See* SALVAGGIO, J., et al.), *22* (Abst.); 128 (Abst.)
ARROBIO, J. O. (*See* KIM, H. W., et al.), *29* (Abst.)
ASQUITH, P. (*See* THOMPSON, R. A., et al.), *16* (Abst.)
ATWOOD, W. G. (*See* LOGAN, L. D., et al.), *32* (Abst.)
AUGUST, C. S. (*See* KRETSCHMER, R., et al.), *19* (Abst.)
AVERBACH, A. M. (*See* GLEICH, G. J., et al.), 108 (Abst.)

B

BAECHER, L. (*See* MALLEY, A., et al.), 125 (Abst.)
BAER, H., GODFREY, H., MALONEY, C. J., NORMAN, P. S., and LICHTENSTEIN, L. M., 347
BAER, R. L. (*See* FELLNER, M. J., et al.), 55 (Brief communication)
BANASZAK, E. (*See* FINK, J. N., et al.), 100 (Abst.)
BARBORIAK, J. J. (*See* SOSMAN, A. J., et al.), *35* (Abst.)
BARNARD, J. H., 92; 120 (Abst.)
BARTH, R. F. (*See* SHEAGREN, J., et al.), *6* (Abst.)
BELLANTI, J. A. (*See* KIM, H. W., et al.), *29* (Abst.)

Subject index*

A

Absorption, iron, gastric mucosal antibodies and, *20* (Abst.)
Acetylsalicylic acid (aspirin), need to re-evaluate: presidential message (Farr), 321
Acid, acetylsalicylic (aspirin), need to re-evaluate: presidential message (Farr), 321
  deoxyribonucleic, antibodies in sera of some patients with asthma and bronchitis, 113 (Abst.)
Actinomycetes, thermophilic, precipitins against extracts of, in patients with bagassosis: bagassosis, *22* (Abst.)
Adenyl cyclase system in spleens of mice sensitized bacterially or by beta pharmacological blockade, impairment, 111 (Abst.)
Adrenal function, effect of long-acting parenteral corticosteroids on, *4* (Abst.)
  in steroid-dependent asthmatic patients, 130 (Abst.)
Adrenergic aerosols, asthma induced by, 108 (Abst.)
  beta-, blockade, carbohydrate metabolism and histamine sensitivity after, effect of agents used in treatment of bronchial asthma on (Townley et al.), 71
    mechanism of bronchoconstriction due to, 118 (Abst.)
  receptors, effect of corticosteroids on, in bronchial smooth muscle, 118 (Abst.)
  mechanisms, role in lymphocyte blast transformation, 128 (Abst.)
Aerosols, adrenergic, asthma induced by, 108 (Abst.)
  isoproterenol and prostaglandin E_1, comparison of bronchodilator activities, 119 (Abst.)
  pressurised, rise and fall of asthma mortality in England and Wales in relation to use, *2* (Abst.)
Air conditioning system, contaminated, hypersensitivity pneumonitis due to, 100 (Abst.)
Airway resistance in asthmatic children, relative sensitivity of methods for measuring, *18* (Abst.)
Albumin, lactoferrin, γA, and γG: protein concentrations in sputa from asthmatic children, *40* (Abst.)
Alcoholic liver disease, serum immunoglobulin concentrations in patients with, *47* (Abst.)
Algae, viable, in house dust, 116 (Abst.)
Allergens, chemistry: new antigens generated by pepsin hydrolysis of bovine milk proteins (Spies et al.), 208
  inhalent, in allergic and nonallergic patients, nasal secretory antibody to, 105 (Abst.)
  various, reaginic antibodies to, IgE associated with, 107 (Abst.)
Allergenic component of liverwort: sesquiterpene lactone, *34* (Abst.)
Allergic asthma caused by basidiospores, *10* (Abst.)
  bronchopulmonary aspergillosis, characterization of antibodies and results of treatment in, 112 (Abst.)
    in child, *40* (Abst.)
      North American rarity, clinical and immunologic characteristics, *11* (Abst.)
  cutaneous vasculitis, cryoglobulinemia and, immunologic studies in case of acquired cold urticaria associated with, 122 (Abst.)
  disease in anhidrotic congenital ectodermal dysplasia, increased prevalence (Vanselow et al.), 302
  drug reactions, cardiac disease accompanying (Stein and Wecksell), 48 (Brief communication)
  food-, individuals, histamine release from leukocytes of, using whole food extract antigens, *3* (Abst.)
  mediators, action of hydroxyzine on, 127 (Abst.)
  and nonallergic patients, nasal secretory antibody to inhalent allergens in, 105 (Abst.)
  and normal individuals, IgE concentration in serum, 108 (Abst.)
  obstructive bronchitis and "idiopathic" obstructive pulmonary disease, response of patients with to prednisone, *26* (Abst.)
  patients, disappearance of basophils in specific release of histamine from leukocytes of, 98 (Abst.)

*January, pp. 1-64; February, pp. 65-132; March, pp. 133-194; April, pp. 195-256; May, pp. 257-320; June, pp. 321-384.

Abstracts: January, pp. *1-8*; February, pp. *9-16*; March, pp. *17-24*; April, *25-32*; May, *33-40*; June, *41-48*.

Allergic patients—Cont'd
to penicillins, differing patterns of wheal and flare skin reactivity in, 121 (Abst.)
ragweed-, subjects, antibodies of nasal and parotid secretions of (Dolovich et al.), 286
reactions of lungs to enzymes of *Bacillus subtilis*, *26* (Abst.)
rhinitis, bronchial asthma and, in an entire community, Tecumseh, Michigan, prospective observations on incidence, 102 (Abst.)
sensitivity to cockroach, *48* (Abst.)
Allergoids, studies on, 125 (Abst.)
Allergology and immunopathology in Poland, comments on developments (Beutner), 97 (Correspondence)
Allogenic marrow, transplantation, treatment of lymphopenic hypogammaglobulinemia and bone marrow aplasia by, *24* (Abst.)
Allograft, skin, survival, and lowered maternal immunologic reactivity, *22* (Abst.)
Alum-precipitated aqueous extracts of ragweed in treatment of hay fever, 114 (Abst.)
Alymphoplasia, thymic, with XX/XY lymphoid chimerism to probable maternal-fetal transfusion, *15* (Abst.)
Anaphylactic shock elicited by topical administration of bacitracin, 7 (Abst.)
Anaphylaxis, third-degree, from Hymenoptera stings, nonfatal results in (Barnard), 92
Andersen sampler, simplified application to study of airborne fungus particles (Solomon), 1
Anemia, pernicious, immunoglobulin deficiency and, syndrome: study of ten cases, *20* (Abst.)
Anergic patients, two groups, response in, to transfer of leukocytes from sensitive donors, *14* (Abst.)
Anesthetics, local, allergy to, *12* (Abst.)
Anhidrotic congenital ectodermal dysplasia, increased prevalence of allergic disease in (Vanselow et al.), 302
Announcements, 194, 255, 320, 355
Antibiotic(s), penicillin and cephalosporin, analysis of high-molecular weight contaminants from, 116 (Abst.)
substances, macrolide, use in treatment of asthma (Itkin and Menzel), 146
Antibody(ies), anti-IgE, in infants and children, influence of age and atopy on skin reactivity to, 124 (Abst.)
antinuclear, induced by procainamide: prospective study, *4* (Abst.)
blocking, nasal sprays containing, protective effect in hay fever, 115 (Abst.)
reagin and, isolation of both by antigen D immunoadsorbent, 125 (Abst.)
Antibody(ies)—Cont'd
characterization, and results of treatment in allergic bronchopulmonary aspergillosis, 112 (Abst.)
deoxyribonucleic acid, in sera of some patients with asthma and bronchitis, 113 (Abst.)
gastric mucosal, and iron absorption, *20* (Abst.)
heterophil, mononucleosis-like, experimentally induced in man, *26* (Abst.)
to human IgE produced in monkey, 123 (Abst.)
IgE, in nasal secretions and serum of ragweed-sensitive patients, effect of immunotherapy on, 106 (Abst.)
mumps: Placental transfer and disappearance during first year of life, *36* (Abst.)
of nasal and parotid secretions of ragweed-allergic subjects (Dolovich et al.), 286
secretory, to inhalent allergens in allergic and nonallergic patients, 105 (Abst.)
to ragweed in external secretions, 106 (Abst.)
reactive with *Treponema pallidum*, immunoglobulin class: treated late syphilis, *32* (Abst.)
reaginic, against insulin: demonstration of antigenic distinction between nature and extracted insulin, *39* (Abst.)
reaginic, to various allergens, IgE associated with, 107 (Abst.)
response in human transplant recipients to antilymphocytic globulin in human transplant recipients, 113 (Abst.)
specific, and immunoglobulin synthesis during first weeks of life of premature infants, *6* (Abst.)
synthesis, suppression by chloramphenicol analogs, *29* (Abst.)
Antigen(s), antigenic determinants and, early eosinophilia induced in guinea pigs by intrapulmonary injection of (Samter), 234
Australian, rapid method for detection and quantitation, 112 (Abst.)
-binding capacity, clinical symptoms, leukocyte sensitivity, and P-K activity, correlations between in longitudinal study of ragweed pollinosis, 109 (Abst.)
circulating carcinoembryonic, radioimmunoassay for, 112 (Abst.)
-combining activity associated with immunoglobulin D, *39* (Abst.)
D immunoadsorbent, isolation of both reagin and blocking antibody by, 125 (Abst.)
E content and potency of commercially prepared ragweed extracts (Baer et al.), 347
and whole ragweed extract, histamine release from leukocytes with (Melam et al.), 43

Antigen(s)—Cont'd
food extract, histamine release from leukocytes of food-allergic individuals using, *3* (Abst.)
in vitro transfer of cellular hypersensitivity to: lymphocyte stimulation, *44* (Abst.)
-induced immunological tolerance in man to equine anti-human-thymocyte gamma-globulin, *7* (Abst.)
in vitro histamine release from leukocytes, effect of pollen immunotherapy in children, 114 (Abst.)
new, generated by pepsin hydrolysis of bovine milk proteins: chemistry of allergens (Spies et al.), 208
stimulation, double, of histamine release from human leukocytes, 127 (Abst.)
distinction between nature and extracted insulin: demonstration of: reaginic antibody against insulin, *39* (Abst.)
Antilymphocyte serum, reticuloendothelial blockade produced by, *6* (Abst.)
Antilymphocytic globulin, in human transplant recipients, antibody response in human transplant recipients, 113 (Abst.)
Antisera, specific, histamine release from human lung by, *28* (Abst.)
Aplasia, bone marrow, lymphopenic hypogammaglobulinemia and, treatment by transplantation of allogenic marrow, *24* (Abst.)
Aqueous extracts of ragweed, alum-precipitated, in treatment of hay fever, 114 (Abst.)
Arterial blood gases in bronchial asthma (Miyamoto et al.), 248 (Brief communication)
Aspergillosis, allergic bronchopulmonary, characterization of antibodies and results of treatment in, 112 (Abst.)
in child, *40* (Abst.)
North American rarity, clinical and immunologic characteristics, *11* (Abst.)
Aspirin, acetylsalicylic acid, need to reevaluate: presidential message (Farr), 321
Asthma, allergic, caused by basidiospores, *10* (Abst.)
bronchial, and allergic rhinitis in an entire community, Tecumseh, Michigan, prospective observations on incidence, 102 (Abst.)
arterial blood gases in (Miyamoto et al.), 248 (Abst.)
decreased plasma free fatty acids and urinary epinephrine in, *2* (Abst.)
effect of agents used in treatment on carbohydrate metabolism and histamine sensitivity after beta-adrenergic blockade (Townley et al.), 71
hay fever and, epidemiology, 103 (Abst.)
in Israel, etiologic factors, *18* (Abst.)
Bronchial asthma—Cont'd
verbal desensitization in treatment, *34* (Abst.)
and bronchitis, deoxyribonucleic acid antibodies in sera of some patients with, 113 (Abst.)
case caused by box elder beetle, 103 (Abst.)
Simulium jenningsi (order Diptera) protected by hyposensitization, 103 (Abst.)
chronic intractable, in children, disodium cromoglycate in treatment, 132 (Abst.)
changing steroid resistance in, 131 (Abst.)
comparison of disodium cromoglycate and placebo for treatment, 131 (Abst.)
extrinsic, and hay fever, long-term effect of moving on course, 102 (Abst.)
severe, treatment with disodium cromoglycate (Intal), 132 (Abst.)
infectious, hyposensitization with bacterial vaccine in, *10* (Abst.)
induced by adrenergic aerosols, 108 (Abst.)
mortality in England and Wales, rise and fall in relation to use of pressurised aerosols, *2* (Abst.)
New Orleans: relationship of climatologic and seasonal factors to outbreaks, (Salvaggio et al.), 257
psychosocial assets and severity, 130 (Abst.)
use of macrolide antibiotic substances in treatment (Itkin and Menzel), 146
Asthmatic children, bronchial sensitivity to methacholine, effect of live measles vaccine on, 104 (Abst.)
pharmacologic effects of epinephrine in, 117 (Abst.)
protein concentrations in sputa from: albumin, lactoferrin, γA, and γG, *40* (Abst.)
relative sensitivity of methods for measuring airway resistance in, *18* (Abst.)
eczematous, and normal subjects, metabolic responses to epinephrine in, 117 (Abst.)
and normal subjects, cardiopulmonary effect of methacholine in, (Grieco and Pierson), 195
patients, chronic steroid-dependent, successful initiation of alternate day prednisone in, 109 (Abst.)
steroid-dependent, adrenal function, 130 (Abst.)
Asthmaticus, status: bicarbonate therapy and its complication, 104 (Abst.)
Ataxia-telangiectasia, immunoglobulin E deficiency in, *22* (Abst.)
Atopic allergy, human, potential mouse model for reagin production in, 99 (Abst.)
dermatitis and urticaria, levels in: immunoglobulin E in dermatoses, *43* (Abst.)
diseases, IgE concentrations in children with: clinical study, *30* (Abst.)

XUM

Atopic—Cont'd
and nonatopic individuals, comparison of IgE in, 107 (Abst.)
Atopy, age and, influence on skin reactivity to anti-IgE antibody in infants and children, 124 (Abst.)
role in development of clinical hypersensitivity: Hymenoptera sensitivity (Schwartz and Kahn), 87
Atropine, role as mediator blocker of induced bronchial obstruction (Itkin and Anand), 178
Australian antigen, rapid method for detection and quantitation, 112 (Abst.)
Autoimmune gastritis, experimental, in rhesus monkey, *31* (Abst.)

B

Bacillus subtilis, allergic reactions of lungs to enzymes of, *26* (Abst.)
enzyme, reaginic allergy in factory workers exposed to, 100 (Abst.)
Bacitracin, topical administration, anaphylactic shock elicited by, *7* (Abst.)
Bacterial vaccine, hyposensitization with, in infectious asthma, *10* (Abst.)
Bagassosis: precipitins against extracts of thermophilic actinomycetes in patients with bagassosis, *22* (Abst.)
Barret, Irwin William, 256 (Obit.)
Basidiospores, allergic asthma caused by, *10* (Abst.)
Basophils, disappearance in specific release of histamine from leukocytes of allergic patients, 98 (Abst.)
Beetle, box elder, case of asthma caused by, 130 (Abst.)
Betamethasone-17-valerate, ^{3}H-, distribution of, after topical application in domestic pig, *28* (Abst.)
Bicarbonate therapy and its complications: status asthmaticus, 104 (Abst.)
Blast transformations, lymphocyte, role of adrenergic mechanisms in, 128 (Abst.)
Blockade, beta-adrenergic, mechanism of bronchoconstriction due to, 118 (Abst.)
differential, of exercise-induced bronchospasm in childhood, 119 (Abst.)
Blocker, mediator, of induced bronchial obstruction, role of atropine as (Itkin and Anand), 178
Blocking antibody, nasal sprays containing, protective effect in hay fever, 115 (Abst.)
reagin and, isolation of both by antigen D immunoadsorbent, 125 (Abst.)
Blood gases, arterial, in bronchial asthma (Miyamoto et al.), 248 (Brief communication)
Bone marrow aplasia, lymphopenic hypogammaglobulinemia and, treatment by transplantation of allogenic marrow, *24* (Abst.)
Bovine milk protein(s) inducible malabsorption, possible pathogenetic mechanisms, 122 (Abst.)
pepsin hydrolysis of, new antigens generated by: chemistry of allergens (Spies et al.), 208
Bradykinin, histamine, kallikrein and, cutaneous reactions to, in healthy subjects and in patients with urticaria, *10* (Abst.)
Bronchial asthma and allergic rhinitis in an entire community, Tecumseh, Michigan, prospective ovservations on incidence, 102 (Abst.)
arterial blood gases in (Miyamoto et al.), 248 (Brief communication)
decreased plasma free fatty acids and urinary epinephrine in, *2* (Abst.)
effect of agents used in treatment on carbohydrate metabolism and histamine sensitivity after beta-adrenergic blockade (Townley et al.), 71
hay fever and, epidemiology, 103 (Abst.)
in Israel, etiologic factors, *18* (Abst.)
verbal desensitization in treatment, *34* (Abst.)
obstruction, induced, role of atropine as mediator blocker (Itkin and Anand), 178
polyps, multiple, *42* (Abst.)
sensitivity of asthmatic children to methacholine, effect of live measles vaccine on, 104 (Abst.)
smooth muscle, effect of corticosteroids on beta-adrenergic receptors in, 118 (Abst.)
Bronchitis, "allergic" obstructive, and "idiopathic" obstructive pulmonary disease, response of patients with to prednisone, *26* (Abst.)
deoxyribonucleic acid antibodies in sera of some patients with asthma and, 113 (Abst.)
Bronchoconstriction due to beta-adrenergic blockade, mechanism, 118 (Abst.)
Bronchodilator activities of isoproterenol and prostaglandin E_1 aerosols, comparison, 119 (Abst.)
and cardiovascular activity, double-blind trial to compare: salbutamol and isoproterenol, *44* (Abst.)
Bronchopulmonary aspergillosis, allergic, characterization of antibodies and results of treatment in, 112 (Abst.)
in child, *40* (Abst.)
North American rarity, clinical and immunologic characteristics, *11* (Abst.)
Bronchospasm and dyspnea from inappropriate postexercise hyperventilation, *42* (Abst.)
exercise-induced, in childhood, differential blockade of, 119 (Abst.)
Buffam, William P., 356 (Obit.)

C

Carbohydrate metabolism and histamine sensitivity after beta-adrenergic blockade, effect of agents used in treatment of bronchial asthma on (Townley et al.), 71
Carcinoembryonic antigen, circulating, radioimmunoassay for, 112 (Abst.)
Cardiac disease accompanying allergic drug reactions (Stein and Wecksell), 48 (Brief communication)
Cardiopulmonary effects of methacholine in asthmatic and normal subjects (Grieco and Pierson), 195
Cardiovascular and bronchodilator activity, double-blind trial to compare: salbutamol and isoproterenol, *44* (Abst.)
Cell(s) from cerebrospinal fluid in patient with multiple sclerosis, in vitro synthesis of IgG by, *46* (Abst.)
lymphoid, from pollen-stimulated cultures, IgE in, *5* (Abst.)
mast, rat, degranulation technique, in vitro detection of human IgE mediated immediate hypersensitivity reactions to pollen and penicillin(s) by, 126 (Abst.)
detection of human IgE reagins utilizing, 126 (Abst.)
-mediated (delayed) hypersensitivity in patients with summer hay fever, *34* (Abst.)
immunity, effect of cytotoxic agents on passive transfer of, *45* (Abst.)
reagin-forming, in tissues of parasite infected rats, 123 (Abst.)
white-pollen interactions (Siegel and Sherman), 133
Cellular and humoral immune responses, correlation between transformation and: relationship between lymphocyte transformation and immune responses, *30* (Abst.)
hypersensitivity, transfer to antigen in vitro: lymphocyte stimulation, *44* (Abst.)
immune defect in chronic mucocutaneous moniliasis, characterization, 101 (Abst.)
immunity, impaired, recurrent infections, and episodic lymphopenia, *19* (Abst.)
and immunological changes after treatment of pollen allergy in children, 110 (Abst.)
mechanisms in depression of delayed hypersensitivity in 6-mercaptopurine, 129 (Abst.)
Cephalosporin and penicillin antibiotics, analysis of high-molecular weight contaminants from, 116 (Abst.)
Cerebrospinal fluid in patient with multiple sclerosis, in vitro synthesis of IgG by cells from, *46* (Abst.)
Chemistry of allergens: new antigens generated by pepsin hydrolysis of bovine milk proteins (Spies et al.), 208
Chimerism, XX/XY lymphoid, secondary to probable maternal-fetal transfusion, thymic alymphoplasia with, *15* (Abst.)
Chloramphenicol analogs, suppression of antibody synthesis by, *29* (Abst.)
Chloroacetophenone, 1-, and chemical mace, contact dermatitis due to, *3* (Abst.)
Chromosomes: XX/XY lymphoid chimerism secondary to probable maternal-fetal transfusion, thymic alymphoplasia with, *15* (Abst.)
Climatologic and seasonal factors, relationship to outbreaks: New Orleans asthma (Salvaggio et al.), 257
Coffin, S. Farnum, Jr., 63 (Obit.)
Cold urticaria, acquired, associated with cryoglobulinemia and allergic cutaneous vasculitis, immunologic studies in case, 122 (Abst.)
further studies, 121 (Abst.)
Communication, common language for (Perlman), 62 (Correspondence)
Complement, fifth component (C5), amelioration of seborrheic dermatitis by replacement of, 110 (Abst.)
familial disorder of, type of seborrheic dermatitis and, further studies on nature, 111 (Abst.)
Compton, Edgar L., 358 (Obit.)
Congenital ectodermal dysplasia, anhidrotic, increased prevalence of allergic disease in (Vanselow et al.), 303
Contact dermatitis due to 1-chloroacetophenone and chemical mace, *3* (Abst.)
shoe, *27* (Abst.)
Coombs test, postitive, penicillin-induced, in newborn, *27* (Abst.)
Correspondence, 62, 97
Corticosteroid(s), effect on beta-adrenergic receptors in bronchial smooth muscle, 118 (Abst.)
parenteral, long-acting, effect on adrenal function, *4* (Abst.)
Cromoglycate, disodium (Intal), treatment of severe extrinsic asthma with, 132 (Abst.)
in treatment of chronic intractable asthma in children, 132 (Abst.)
and placebo for treatment of asthma, comparison, 131 (Abst.)
Cryoglobulinemia and allergic cutaneous vasculitis, immunologic studies in case of acquired cold urticaria associated with, 122 (Abst.)
Cultures, pollen-stimulated, IgE in lymphoid cells from, *5* (Abst.)
Cutaneous reactions to kallikrein, bradykinin, and histamine in healthy subjects and in patients with urticaria, *10* (Abst.)
vasculitis, allergic, cryoglobulinemia and, immunologic studies in case of acquired cold urticaria associated with, 122 (Abst.)

XUM

Cyclase, adenyl, system, in spleens of mice sensitized bacterially or by beta pharmacological blockade, impairment, 111 (Abst.)
Cytotoxic agents, effect on passive transfer of cell-mediated immunity, *45* (Abst.)
primary immune response to *Listeria monocytogenes*, *45* (Abst.)

D

Dander-, horse, and grass pollen-sensitive individuals, association of IgE with reaginic activity in sera from (Frick and Ishizaka), 220
Decongestant, oral, influence on Eustachian tube function in children (Miller), 187
Degranulation technique, rat mast cell, in vitro detection of human IgE mediated immediate hypersensitivity reactions to pollens and penicillin(s) by, 126 (Abst.)
Delayed hypersensitivity, depression by 6-mercaptopurine, cellular mechanisms in, 129 (Abst.)
responses, control of disease, and steroid side effects, evaluation: alternate-day prednisone therapy, *13* (Abst.)
Deoxyribonucleic acid antibodies in sera of some patients with asthma and bronchitis, 113 (Abst.)
Dermatitis, atopic, and urticaria, levels in: immunoglobulin E in dermatoses, *43* (Abst.)
contact, due to 1-chloroacetophenone and chemical mace, *3* (Abst.)
shoe, *27* (Abst.)
occupational, from pyrolysis products of polythene, *18* (Abst.)
seborrheic, amelioration by replacement of fifth component of complement (C5), 110 (Abst.)
type, and familial disorder of fifth component of complement, further studies on nature, 111 (Abst.)
Dermatophagoides culinae and house dust, reaginic antibody (IgE), skin, and provocation tests to in respiratory allergy, *37* (Abst.)
Dermatoses, immunoglobulin E in: levels in atopic dermatitis and urticaria, *43* (Abst.)
Dermographism, fine morphology of human skin in (Cauna and Levine), 266
Desensitization, clinical, mechanisms in urticarial hypersensitivity to penicillin (Fellner et al.), 55 (Brief communication)
verbal, in treatment of bronchial asthma, *34* (Abst.)
Diffusion, single radial, electroimmunodiffusion and, quantitation of immunoglobulins in dilute solution and parotid saliva by, 128 (Abst.)
Dinitrophenyl(DNP)-poly-L-lysine, competitive effect in responder and nonresponder guinea pigs, *37* (Abst.)
Dinitrophenyl(DNP)-poly-L-lysine—Cont'd
selective immune reactivity to, in randomly bred guinea pigs, *38* (Abst.)
Diptera, order, *Simulium jenningsi*, case of asthma caused by, protected by hyposensitization, 103 (Abst.)
Disease(s), alcoholic liver, serum immunoglobulin concentrations in patients with, *47* (Abst.)
allergic, increased prevalence in anhidrotic congentital ectodermal dysplasia (Vanselow et al.), 302
atopic, IgE concentrations in children with: clinical study, *30* (Abst.)
cardiac, accompanying allergic drug reactions (Stein and Wecksell), 48 (Brief communication)
control, delayed hypersensitivity responses, and steroid side effects, evaluation: alternate-day prednisone therapy, *13* (Abst.)
"idiopathic" obstructive pulmonary, and "allergic" obstructive bronchitis, response of patients with to prednisone, *26* (Abst.)
lung, maximum expiratory flow volume in patients with: comparative study with pulmonary function tests, *13* (Abst.)
Disodium cromoglycate (Intal), treatment of severe extrinsic asthma with, 132 (Abst.)
and placebo for treatment of asthma, comparison, 131 (Abst.)
in treatment of chronic intractable asthma in children, 132 (Abst.)
Drug, fixed-, eruption due to tetracycline: report of case, *19* (Abst.)
reactions, allergic, cardiac disease accompanying (Stein and Wecksell), 48 (Brief communication)
Dust, house, and *Dermatophagoides culinae*, reaginic antibody (IgE), skin, and provocation tests to, in respiratory allergy, *37* (Abst.)
viable algae in, 116 (Abst.)
wood, hypersensitivity to, *35* (Abst.)
Dysplasia, anhidrotic congenital ectodermal, increased prevalence of allergic disease in (Vanselow et al.), 302
Dyspnea and bronchospasm from inappropriate postexercise hyperventilation, *42* (Abst.)

E

Ectodermal dysplasia, anhidrotic congenital, increased prevalence of allergic disease in (Vanselow et al.), 302
Eczematous, asthmatic, and normal subjects, metabolic responses to epinephrine in, 117 (Abst.)
Electroimmunodiffusion and single radial diffusion, quantitation of immunoglobulins in dilute solution and parotid saliva by, 128 (Abst.)
Enzyme(s) of *Bacillus subtilis*, allergic reactions of lungs to, *26* (Abst.)
reaginic allergy in factory workers exposed to, 100 (Abst.)

Enzyme(s)—Cont'd
system, kallikreinogen-kallikrein, of human plasma, *36* (Abst.)
Eosinophilia, early, induced in guinea pigs by intrapulmonary injection of antigenic determinants and antigens (Samter), 234
Epidemiology of hay fever and bronchial asthma, 103 (Abst.)
Epinephrine, metabolic responses to, in asthmatic, eczematous, and normal subjects, 117 (Abst.)
pharmacologic effects in asthmatic children, 117 (Abst.)
syncope in children following, *35* (Abst.)
urinary, decreased plasma free fatty acids and, in bronchial asthma, *2* (Abst.)
Erythroblastosis fetalis, Rh, possible graft-versus-host reaction after intrauterine transfusion for, *24* (Abst.)
Eustachian tube function in children, influence of oral decongestant on (Miller), 187
Exercise-induced bronchospasm in childhood, differential blockade of, 119 (Abst.)
Expectorant effect of glyceryl guaiacolate: controlled in vitro and in vivo study, 115 (Abst.)
Expiratory flow volume, maximum, in patients with lung disease: comparative study with pulmonary function tests, *13* (Abst.)
Extracts, ragweed, commercially prepared, potency and antigen E content (Baer et al.), 347
Extrinsic asthma and hay fever, long-term effect of moving on course, 102 (Abst.)
severe, treatment with disodium cromoglycate (Intal), 132 (Abst.)

F

Factory workers exposed to *B. subtilis* enzyme, reaginic allergy in, 100 (Abst.)
Farmer's lung in adolescent boy, *16* (Abst.)
in 10-year-old girl, *8* (Abst.)
Fatty acids, free, plasma, and urinary epinephrine, decreased, in bronchial asthma, *2* (Abst.)
Fc portion of γE molecules, biologic function, 124 (Abst.)
-Fc binding of IgG: property demonstrated only after isolation of normal IgG, 125 (Abst.)
Fetal lymphocytes, in vitro transformation, *23* (Abst.)
maternal-, transfusion, probable, thymic alymphoplasia with XX/XY lymphoid chimerism secondary to, *15* (Abst.)
Flare, wheal and, skin reactivity, differing patterns in patients allergic to penicillins, 121 (Abst.)
Food proteins in hypersensitive and normal subjects, in vitro responses of leukocytes to, 129 (Abst.)
-allergic individuals, histamine release from leukocytes of, using whole food extract antigens, *3* (Abst.)
Fungus particles, airborne, simplified application of Andersen sampler to study (Solomon), 1

G

Gamma-A and γG, albumin, lactoferrin, and: protein concentrations in sputa from asthmatic children, *40* (Abst.)
-E (IgE) elevated levels in conditions other than classical allergy (Heiner and Rose), 30
and gamma-G molecules, presence on human leukocytes, 98 (Abst.)
human, in sputum and nasal fluids, 105 (Abst.)
molecules, biologic function of Fc portion, 124 (Abst.)
-G, gamma-E and, molecules, presence on human leukocytes, 98 (Abst.)
albumin, lactoferrin, γA, and: protein concentrations in sputa from asthmatic children, *40* (Abst.)
globulin, equine anti-human-thymocyte, antigen-induced immunological tolerance to, in man, *7* (Abst.)
Gases, arterial blood, in bronchial asthma (Miyamoto et al.), 248 (Brief communication)
Gastric mucosal antibodies and iron absorption, *20* (Abst.)
Gastritis, autoimmune, experimental, in rhesus monkeys, *31* (Abst.)
Globulin, antilymphocytic, in human transplant recipients, antibody response in human transplant recipients, 113 (Abst.)
zoster immune, prevention of varicella by, *15* (Abst.)
Glyceryl guaiacolate, expectorant effect: controlled in vitro and in vivo study, 115 (Abst.)
Graft-versus-host reaction, possible, after intrauterine transfusion for Rh erythroblastosis fetalis, *24* (Abst.)
Guaiacolate, glyceryl, expectorant effect: controlled in vitro and in vivo study, 115 (Abst.)

H

Hay fever, alum-precipitated aqueous extracts of ragweed in treatment, 114 (Abst.)
and bronchial asthma, epidemiology, 103 (Abst.)
and extrinsic asthma, long-term effect of moving on course, 102 (Abst.)
protective effect of nasal sprays containing blocking antibody in, 115 (Abst.)

XUM

Hay fever—Cont'd
summer, cell-mediated (delayed) hypersensitivity in patients with, *34* (Abst.)
timothy pollen fractions in treatment of: clinical and immunological response to small and higher molecular weight fractions (Malley and Perlman), 14
Heart, transplanted human, rejection: indexes of recognition and problems in prevention, *14* (Abst.)
Hemagglutinating activity in parotid secretions and serum from ragweed-sensitive individuals: clinical correlation, 123 (Abst.)
Hepatotoxicity due to treatment with papaverine, *36* (Abst.)
Heterophil antibodies, mononucleosis-like, experimentally induced, in man, *26* (Abst.)
Histamine, kallikrein, bradykinin and, cutaneous reactions in healthy subjects and in patients with urticaria, *10* (Abst.)
release from human leukocytes, double antigen stimulation, 127 (Abst.)
lung by specific antisera, *28* (Abst.)
leukocytes of food-allergic individuals using whole food extract antigens, *3* (Abst.)
leukocytes with antigen E and whole ragweed extract (Melam et al.), 43
leukocytes, antigen-induced in vitro, effect of pollen immunotherapy in children on, 114 (Abst.)
sensitivity, carbohydrate metabolism and, after beta-adrenergic blockade, effect of agents used in treatment of bronchial asthma on (Townley et al.), 71
specific release, from leukocytes of allergic patients, disappearance of basophils in, 98 (Abst.)
Humoral and cellular immune responses, correlation between transformation and: relationship between lymphocyte transformation and immune responses, *30* (Abst.)
Hydrolysis, pepsin, of bovine milk proteins, new antigens generated by: chemistry of allergens (Spies et al.), 208
Hydroxyzine, action on allergic mediators, 127 (Abst.)
Hymenoptera sensitivity: role of atopy in development of clinical hypersensitivity (Schwartz and Kahn), 87
sting(s), nonfatal results in third-degree anaphylaxis from (Barnard), 92
sensitivity, value of skin tests in treatment of, 120 (Abst.)
Hypersensitive and normal subjects, in vitro responses of leukocytes to food proteins in, 129 (Abst.)
Hypersensitivity, cell-mediated (delayed), in patients with summer hay fever, *34* (Abst.)
Hypersensitivity—Cont'd
cellular, transfer to antigen in vitro: lymphocyte stimulation, *44* (Abst.)
clinical, role of atopy in development: Hymenoptera sensitivity (Schwartz and Kahn), 87
delayed, acquisition following attenuated mumps virus infection, *32* (Abst.)
depression by 6-mercaptopurine, cellular mechanisms in, 129 (Abst.)
immediate type, respiratory responses in subhuman primates with, *47* (Abst.)
pneumonitis due to contaminated air conditioning system, 100 (Abst.)
reactions, immediate, to pollens and penicillin(s), human IgE mediated, in vitro detection by a modified rat mast cell degranulation technique, 126 (Abst.)
responses, delayed, control of disease, and steroid side effects, evaluation: alternate-day prednisone therapy, *13* (Abst.)
urticarial, to penicillin, mechanisms of clinical desensitization in (Fellner et al.), 55 (Brief communication)
to wood dust, *35* (Abst.)
Hyperventilation, inappropriate postexercise, dyspnea and bronchospasm from, *42* (Abst.)
Hypogammaglobulinemia, lymphopenic, and bone marrow aplasia, treatment by transplantation of allogenic marrow, *24* (Abst.)
Hyposensitization with bacterial vaccine in infectious asthma, *10* (Abst.)
case of asthma caused by *Simulium jenningsi*, protected by, 103 (Abst.)

I

Immune defect, cellular, in chronic mucocutaneous moniliasis, characterization, 101 (Abst.)
globulin, zoster, prevention of varicella by, *15* (Abst.)
reactivity, selective, to DNP-poly-L-lysine in randomly bred guinea pigs, *38* (Abst.)
response(s) and lymphocyte transformation, relationship between: correlations between transformation and humoral and cellular immune responses, *30* (Abst.)
primary, to *Listeria monocytogenes*, effect of cytotoxic agents on, *45* (Abst.)
Immunity, cell-mediated, effect of cytotoxic agents on passive transfer of, *45* (Abst.)
impaired cellular, recurrent infections, and episodic lymphopenia, *19* (Abst.)
Immunoadsorbent, antigen D, isolation of both reagin and blocking antibody by, 125 (Abst.)
Immunochemical studies of selected subjects with wheat intolerance (Heiner et al.), 333

Immunoglobulin(s) A (IgA) deficiency, correlation of milk precipitins with, *23* (Abst.)
secretory, in serum, *16* (Abst.)
class of antibodies reactive with *Treponema pallidum:* treated late syphilis, *32* (Abst.)
concentrations, serum, in patients with alcoholic liver disease, *47* (Abst.)
D, antigen-combining activity associated with, *39* (Abst.)
deficiency and pernicious anemia, syndrome: study of ten cases, *20* (Abst.)
E (IgE), anti-, antibody, in infants and children, influence of age and atopy on, 124 (Abst.)
antibodies in nasal secretions and serum of ragweed-sensitive patients, effect of immunotherapy on, 106 (Abst.)
association with reaginic activity in sera from grass pollen- and horse dander-sensitive individuals (Frick and Ishizaka), 220
concentrations in children with atopic diseases: clinical study, *30* (Abst.)
serum of normal and allergic individuals, 108 (Abst.)
deficiency in ataxia-telangiectasia, *22* (Abst.)
in dermatoses: levels in atopic dermatitis and urticaria, *43* (Abst.)
elevated levels in conditions other than classical allergy (Heiner and Rose), 30
human, antibodies to, produced in monkey, 123 (Abst.)
mediated immediate hypersensitivity reactions to pollens and penicillin(s) by modified rat mast cell degranulation technique, in vitro detection, 126 (Abst.)
lymphoid cells from pollen-stimulated cultures, *5* (Abst.)
in nonatopic and atopic individuals, comparison, 107 (Abst.)
with reaginic antibodies to various allergens, 107 (Abst.)
(reaginic antibody), skin, and provocation tests to *Dermatophagoides culinae* and house dust in respiratory allergy, *37* (Abst.)
type reagins, detection utilizing rat mast cells, 126 (Abst.)
G (IgG), Fc-Fc binding: property demonstrated only after isolation of normal IgG, 125 (Abst.)
in vitro synthesis by cells from cerebrospinal fluid in patient with multiple sclerosis, *46* (Abst.)
quantitation in dilute solution and parotid saliva by electroimmunodiffusion and single radial diffusion, 128 (Abst.)
and specific antibody synthesis during first weeks of life of premature infants, *6* (Abst.)
Immunoglobulin(s)—Cont'd
synthesis in vitro by human thymus: comparison of myasthenia gravis and normal thymus, *46* (Abst.)
Immunologic(al) and cellular changes after treatment of pollen allergy in children, 110 (Abst.)
characteristics, clinical and, allergic bronchopulmonary aspergillosis, North American rarity, *11* (Abst.)
reactivity, lowered, skin graft survival and, *22* (Abst.)
response, clinical and, to small and higher molecular weight fractions: timothy pollen fractions in treatment of hay fever (Malley and Perlman), 14
studies in case of acquired cold urticaria associated with cryoglobulinemia and allergic cutaneous vasculitis, 122 (Abst.)
study of tree pollen antigens, 120 (Abst.)
tolerance, antigen-induced, in man to equine anti-human-thymocyte gamma-globulin, *7* (Abst.)
Immunopathology, allergology and, in Poland, comments on developments (Beutner), 97 (Correspondence)
Immunotherapy, effect on IgE antibodies in nasal secretions and serum of ragweed-sensitive patients, 106 (Abst.)
pollen, effect in children on antigen-induced in vitro histamine release from leukocytes, 114 (Abst.)
Infected, parasite, rats, reagin-forming cells in tissues, 123 (Abst.)
Infection(s), attenuated mumps virus, acquisition of delayed hypersensitivity following, *32* (Abst.)
natural, respiratory syncytial virus neutralizing activity in nasal secretions following, *29* (Abst.)
parasitic, isohemagglutinins in, *21* (Abst.)
Infectious asthma, hyposensitization with bacterial vaccine in, *10* (Abst.)
Influenza rhinitis in ferrets, symptomatic therapy by topical application of compounds (Haff), 163
Inhalent allergens in allergic and nonallergic patients, nasal secretory antibody to, 105 (Abst.)
Insulin, reaginic antibody against: demonstration of antigenic distinction between nature and extracted insulin, *39* (Abst.)
Intal, disodium cromoglycate, treatment of severe extrinsic asthma with, 132 (Abst.)
Intrapulmonary injection of antigenic determinants and antigens, early eosinophilia induced in guinea pigs by (Samter), 234
Intrauterine transfusion for Rh erythroblastosis fetalis, possible graft-versus-host reaction after, *24* (Abst.)
Iron absorption, gastric mucosal antibodies and, *20* (Abst.)

XUM

Isohemagglutinins in parasitic infections, *21* (Abst.)
Isoproterenol and prostaglandin E_1 aerosols, comparison of bronchodilator activities, 119 (Abst.)
and salbutamol: double-blind trial to compare bronchodilator and cardiovascular activity, *44* (Abst.)

K

Kallikrein, bradykinin, and histamine, cutaneous reactions to, in healthy subjects and in patients with urticaria, *10* (Abst.)
-kallikreinogen enzyme system of human plasma, *36* (Abst.)
Kallikreinogen-kallikrein enzyme system of human plasma, *36* (Abst.)
Kidney transplantation, significance of positive cross-match test in, *5* (Abst.)

L

Lactoferrin, γA, and γG, albumin and: protein concentrations in sputa from asthmatic children, *40* (Abst.)
Lactone, sesquiterpene: allergenic component of liverwort, *34* (Abst.)
Leukocyte(s) of allergic patients, disappearance of basophils in specific release of histamine from, 98 (Abst.)
antigen-induced in vitro histamine release from, effect of pollen immunotherapy in children on, 114 (Abst.)
of food-allergic individuals, histamine release from using whole food extract antigens, *3* (Abst.)
histamine release from, with antigen E and whole ragweed extract (Melam et al.), 43
human, double antigen stimulation of histamine release from, 127 (Abst.)
presence of γE and γG molecules on, 98 (Abst.)
in vitro responses, to food proteins in hypersensitive and normal subjects, 129 (Abst.)
from sensitive donors, response in two groups of anergic patients to transfer of, *14* (Abst.)
sensitivity, clinical symptoms, antigen-binding capacity and P-K activity, correlations between in longitudinal study of ragweed pollinosis, 109 (Abst.)
(white cell)-pollen interactions (Siegel and Sherman), 133
Listeria monocytogenes, effect of cytotoxic agents on primary immune response to, *45* (Abst.)
Liver disease, alcoholic, serum immunoglobulin concentrations in patients with, *47* (Abst.)
Local anesthetics, allergy to, *12* (Abst.)
Lung(s), allergic reactions, to enzymes of *Bacillus subtilis*, *26* (Abst.)
disease, maximum expiratory flow volume in patients with: comparative study with pulmonary function tests, *13* (Abst.)
farmer's, in adolescent boy, *16* (Abst.)
in 10-year-old girl, *8* (Abst.)
Lymphocyte(s) blast transformation, role of adrenergic mechanisms in, 128 (Abst.)
fetal, in vitro transformation, *23* (Abst.)
peripheral, to phytohemagglutinin stimulation, two forms of unresponsiveness of, 101 (Abst.)
stimulation: transfer of cellular hypersensitivity to antigen in vitro, *44* (Abst.)
transformation and immune responses, relationship between: correlations between transformation and humoral and cellular immune responses, *30* (Abst.)
Lymphoid cells, from pollen-stimulated cultures, IgE in, *5* (Abst.)
chimerism, XX/XY, secondary to probable maternal-fetal transfusion, thymic alymphoplasia with, *15* (Abst.)
Lymphopenia, episodic, recurrent infections, and impaired cellular immunity, *19* (Abst.)
Lymphopenic hypogammaglobulinemia and bone marrow aplasia, treatment by transplantation of allogenic marrow, *24* (Abst.)

M

Mace, chemical, 1-chloroacetophenone and, contact dermatitis due to, *3* (Abst.)
Macrolide antibiotic substances, use in treatment of asthma (Itkin and Menzel), 146
Malabsorption, bovine milk protein inducible, possible pathogenetic mechanisms, 122 (Abst.)
Marrow, bone, aplasia, lymphopenic hypogammaglobulinemia and, treatment by transplantation of allogenic marrow, *24* (Abst.)
Mast cells, rat, detection of human IgE reagins utilizing, 126 (Abst.)
degranulation technique, in vitro detection of human IgE mediated immediate hypersensitivity reactions to pollens and penicillin(s) by, 126 (Abst.)
Maternal-fetal transfusion, probable, thymic alymphoplasia with XX/XY lymphoid chimerism secondary to, *15* (Abst.)
Measles vaccine, live, effect on bronchial sensitivity of asthmatic children to methacholine, 104 (Abst.)
Mediator(s), allergic, action of hydroxyzine on, 127 (Abst.)

Mediator(s)—Cont'd
blocker of induced bronchial obstruction, role of atropine as (Itkin and Anand), 178
Mercaptopurine, 6-, cellular mechanisms in depression of delayed hypersensitivity by, 129 (Abst.)
Metabolic responses to epinephrine in asthmatic, eczematous, and normal subjects, 117 (Abst.)
Metabolism, carbohydrate, and histamine sensitivity after beta-adrenergic blockade, effect of agents used in treatment of bronchial asthma on (Townley et al.), 71
Methacholine, bronchial sensitivity of asthmatic children to, effect of live measles vaccine on, 104 (Abst.)
cardiopulmonary effects in asthmatic and normal subjects (Grieco and Pierson), 195
Military service, allergy practice in (Reisman), 65
Milk precipitins, correlation with IgA deficiency, *23* (Abst.)
protein, bovine, inducible malabsorption, possible pathogenetic mechanisms, 122 (Abst.)
pepsin hydrolysis of, new antigens generated by: chemistry of allergens (Spies et al.), 208
Miller, Hyman, 63 (Obit.)
Molecular weight fractions, clinical and immunological response to small and higher: timothy pollen fractions in treatment of hay fever (Malley and Perlman), 14
high-, contaminants from penicillin and cephalosporin antibiotics, analysis, 116 (Abst.)
Molecules, γE, biologic function of Fc portion, 124 (Abst.)
and γG, presence on human leukocytes, 98 (Abst.)
Moniliasis, mucocutaneous, chronic, characterization of cellular immune defect in, 101 (Abst.)
Mononucleosis-like heterophil antibodies in man, experimentally induced, *26* (Abst.)
Morphology, fine, of human skin in dermographism (Cauna and Levine), 266
Mucin, surface, of human trophoblast, *19* (Abst.)
Mucocutaneous moniliasis, chronic, characterization of cellular immune defect in, 101 (Abst.)
Mucosal antibodies, gastric, and iron absorption, *20* (Abst.)
Mumps antibody: placental transfer and disappearance during first year of life, *36* (Abst.)
virus infection, attenuated, acquisition of delayed hypersensitivity following, *32* (Abst.)
Muscle, bronchial smooth, effect of corticosteroids on beta-adrenergic receptors in, 118 (Abst.)
Myasthenia gravis and normal thymus, comparison: immunoglobulin synthesis in vitro by human thymus, *46* (Abst.)

N

Nasal fluids, sputum and, human γE in, 105 (Abst.)
and parotid secretions of ragweed-allergic subjects, antibodies of (Dolovich et al.), 286
secretions, respiratory syncytial virus neutralizing activity in, following natural infection, *29* (Abst.)
and serum of ragweed-sensitive patients, effect of immunotherapy on IgE antibodies in, 106 (Abst.)
secretory antibody to inhalent allergens in allergic and nonallergic patients, 105 (Abst.)
sprays containing blocking antibody in hay fever, protective effect, 115 (Abst.)
Nettles, pollen of: potential determinant of intractability in ragweed pollenosis, 99 (Abst.)
Nitrofurantoin, pleuropneumonic reactions to, *43* (Abst.)
North American rarity, allergic bronchopulmonary aspergillosis, clinical and immunologic characteristics, *11* (Abst.)
Nuclear, anti-, antibody, induced by procainamide: prospective study, *4* (Abst.)

O

Coffin, S. Farnum, Jr., 63
Miller, Hyman, 63
Suesserman, Henry, 64
Barret, Irwin William, 256
Savignac, Raymond J., 356
Buffam, William P., 356
Schwartz, Emanuel, 357
Compton, Edgar L., 358
Obstruction, bronchial, induced, role of atropine as mediator blocker (Itkin and Anand), 178
Oral decongestant, influence on Eustachian tube function in children (Miller), 187

P

Papaverine, hepatotoxicity due to treatment with, *36* (Abst.)
Parasite infected rats, reagin-forming cells in tissues, 123 (Abst.)
Parasitic infections, isohemagglutinins in, *21* (Abst.)
Parotid saliva, dilute solution and, quantitation of immunoglobulins in, by electroimmunodiffusion and single radial diffusion, 128 (Abst.)
secretions, nasal and, of ragweed-allergic subjects, antibodies of (Dolovich et al.), 286

XUM

Parotid secretions—Cont'd
and serum from ragweed-sensitive individuals, hemagglutinating activity in: clinical correlation, 123 (Abst.)
Passive transfer of cell-mediated immunity, effect of cytotoxic agents on, *45* (Abst.)
Pathogenetic mechanisms, possible, of bovine milk protein inducible malabsorption, 122 (Abst.)
Penicillin and cephalosporin antibiotics, analysis of high-molecular weight contamininants from, 116 (Abst.)
-induced positive Coombs test in newborn, *27* (Abst.)
pollens and, human IgE mediated immediate hypersensitivity reactions to, in vitro detection by modified rat mast cell degranulation technique, 126 (Abst.)
urticarial hypersensitivity to, mechanisms of clinical desensitization in (Fellner et al.), 55 (Brief communication)
Pepsin hydrolysis of bovine milk proteins, new antigens generated by: chemistry of allergens (Spies et al.), 208
Peripheral lymphoctyes to phytohemagglutinin stimulation, two forms of unresponsiveness of, 101 (Abst.)
Pernicious anemia, immunoglobulin deficiency and, syndrome: study of ten cases, *20* (Abst.)
Pharmacologic(al), beta, blockade, mice sensitized by, or bacterially, impairment of adenyl cyclase system in spleens, 111 (Abst.)
effects of epinephrine in asthmatic children, 117 (Abst.)
Phytohemagglutinin stimulation, two forms of unresponsiveness of peripheral lymphocytes to, 101 (Abst.)
Placental transfer and disappearance during first year of life: mumps antibody, *36* (Abst.)
Plasma free fatty acids and urinary epinephrine, decreased, in bronchial asthma, *2* (Abst.)
human, kallikreinogen-kallikrein enzyme system of, *36* (Abst.)
Pleuropneumonic reactions to nitrofurantoin, *43* (Abst.)
Pneumonitis, hypersensitivity, due to contaminated air conditioning system, 100 (Abst.)
Pollen(s) allergy in children, immunological and cellular changes after treatment, 110 (Abst.)
antigens, tree, immunologic study, 120 (Abst.)
fractions, timothy, in treatment of hay fever: clinical and immunological response to small and higher molecular weight fractions (Malley and Perlman), 14
Pollen(s)—Cont'd
grass, and horse dander-sensitive individuals, association of IgE with reaginic activity in sera from (Frick and Ishizaka), 220
immunotherapy, effect in children on antigen-induced in vitro histamine release from leukocytes, 114 (Abst.)
of nettles: potential determinant of intractability in ragweed pollenosis, 99 (Abst.)
and penicillin(s), human IgE mediated immediate hypersensitivity reactions to, in vitro detection by modified rat mast cell degranulation technique, 126 (Abst.)
-stimulated cultures, IgE in lymphoid cells from, *5* (Abst.)
-white cell interactions (Siegel and Sherman), 133
Pollinosis, ragweed, longitudinal study, correlations between clinical symptoms, leukocyte sensitivity, antigen-binding capacity, and P-K activity in, 109 (Abst.)
melon and banana sensitivity coincident with (Anderson et al.), 310
potential determinant of intractability; pollen of nettles, 99 (Abst.)
Polyps, multiple bronchial, *42* (Abst.)
Polythene, pyrolysis products of, occupational dermatitis from, *18* (Abst.)
Prausnitz-Küstner (P-K) activity, clinical symptoms, leukocyte sensitivity, antigen-binding capacity, and correlations between in longitudinal study of ragweed pollinosis, 109 (Abst.)
Precipitins against extracts of thermophilic actinomycetes in patients with bagassosis: bagassosis, *22* (Abst.)
milk, correlation with IgA deficiency, *23* (Abst.)
Prednisone, alternate day, successful initiation in chronic steroid-dependent asthmatic patients, 109 (Abst.)
response of patients with "idiopathic" obstructive pulmonary disease and "allergic" obstructive bronchitis to, *26* (Abst.)
therapy, alternate-day: evaluation of delayed hypersensitivity responses, control of disease, and steroid side effects, *13* (Abst.)
Premature infants, immunologlobulin and specific antibody synthesis during first weeks of life of, *6* (Abst.)
Presidential message: need to re-evaluate acetylsalicylic acid (aspirin) (Farr), 321
Procainamide, antinuclear antibody induced by: prospective study, *4* (Abst.)
Prostaglandin E_1 and isoproterenol aerosols, comparison of bronchodilator activities, 119 (Abst.)
Protein(s), bovine milk, inducible malabsorption, possible pathogenetic mechanisms, 122 (Abst.)

Protein(s), bovine milk—Cont'd
pepsin hydrolysis of, new antigens generated by: chemistry of allergens (Spies et al.), 208
concentrations in sputa from asthmatic children: albumin, lactoferrin, γA, and γG, *40* (Abst.)
food, in hypersensitive and normal subjects, in vitro responses of leukocytes to, 129 (Abst.)
Provocation tests, reaginic antibody (IgE), skin and, to *Dermatophagoides culinae* and house dust in respiratory allergy, *37* (Abst.)
Psychosocial assets and severity of asthma, 130 (Abst.)
Pulmonary disease, obstructive "idiopathic," and "allergic" obstructive bronchitis, response of patients with to prednisone, *26* (Abst.)
function tests, comparative study with: maximum expiratory flow volume in patients with lung disease, *13* (Abst.)
Pyrolysis products of polythene, occupational dermatitis from, *18* (Abst.)

R

Radial diffusion, single, electroimmunodiffusion and, quantitation of immunoglobulins in dilute solution and parotid saliva by, 128 (Abst.)
Radioimmunoassay for circulating carcinoembryonic antigen, 112 (Abst.)
Ragweed-allergic subjects, antibodies of nasal and parotid secretions of (Dolovich et al.), 286
alum-precipitated aqueous extracts, in treatment of hay fever, 114 (Abst.)
antibodies to, in external secretions, 106 (Abst.)
extract(s), commercially prepared, potency and antigen E content (Baer et al.), 347
whole, and antigen E, histamine release from leukocytes with (Melam et al.), 43
pollinosis, longitudinal study, correlations between clinical symptoms, leukocyte sensitivity, antigen-binding capacity, and P-K activity in, 109 (Abst).
melon and banana sensitivity coincident with, (Anderson et al.), 310
potential determinant of intractability: pollen of nettles, 99 (Abst.)
-sensitive individuals, parotid secretions and serum from, hemagglutinating activity in: clinical correlation, 123 (Abst.)
patients, nasal secretions and serum of, effect of immunotherapy on IgE antibodies in, 106 (Abst.)
Reaction(s), allergic drug, cardiac disease accompanying (Stein and Weckstell), 48 (Brief communication)
Reaction(s), allergic—Cont'd
of lungs to enzymes of *Bacillus subtilis*, *26* (Abst.)
cutaneous, to kallikrein, bradykinin, and histamine in healthy subjects and in patients with urticaria, *10* (Abst.)
graft-versus-host, possible, after intrauterine transfusion for Rh erythroblastosis fetalis, *24* (Abst.)
hypersensitivity, immediate, to pollens and penicillin(s), human IgE mediated, in vitro detection by modified rat mast cell degranulation technique, 126 (Abst.)
pleuropneumonic, to nitrofurantoin, *43* (Abst.)
Reactivity, immunologic, lowered, skin graft survival and, *22* (Abst.)
selective immune, to DNP-poly-L-lysine in randomly bred guinea pigs, *38* (Abst.)
skin, to anti-IgE antibody in infants and children, influence of age and atopy on, 124 (Abst.)
wheal and flare, differing patterns in patients allergic to penicillins, 121 (Abst.)
Reagin(s) and blocking antibody, isolation of both by antigen D immunoadsorbent, 126 (Abst.)
-forming cells in tissues of parasite infected rats, 123 (Abst.)
IgE-type, detection utilizing rat mast cells, 126 (Abst.)
production in human atopic allergy, potential mouse model for, 99 (Abst.)
Reaginic activity in sera from grass pollen- and horse dander-sensitive individuals, association of IgE with (Frick and Ishizaka), 220
allergy in factory workers exposed to *B. subtilis* enzyme, 100 (Abst.)
antibody(ies) against insulin: demonstration of antigenic distinction between nature and extracted insulin, *39* (Abst.)
(IgE), skin, and provocation tests to *Dermatophagoides culinae* and house dust in respiratory allergy, *37* (Abst.)
to various allergens, IgE associated with, 107 (Abst.)
Receptors, beta-adrenergic, effect of corticosteroids on, in bronchial smooth muscle, 118 (Abst.)
Rejection of transplanted human heart: indexes of recognition and problems in prevention, *14* (Abst.)
Renal function, report of two patients with recurrent impairment: Schonlein-Henoch syndrome, *48* (Abst.)
Resistance, airway, in asthmatic children, relative sensitivity of methods for measuring, *18* (Abst.)
Respiratory allergy, reaginic antibody (IgE), skin, and provocation tests to *Dermatophagoides culinae* and house dust in, *37* (Abst.)

XUM

Respiratory—Cont'd
responses in subhuman primates with immediate type hypersensitivity, *47* (Abst.)
syncytial virus neutralizing activity in nasal secretions following natural infection, *29* (Abst.)
Response(s), antibody, in human transplant recipients to antilymphocytic globulin in human transplant recipients, 113 (Abst.)
delayed hypersensitivity, control of disease, and steroid side effects, evaluation: alternate-day prednisone therapy, *13* (Abst.)
immune, humoral and cellular, correlations between transformation and: relationship between lymphocyte transformation and immune responses, *30* (Abst.)
in vitro, of leukocytes to food proteins in hypersensitive and normal subjects, 129 (Abst.)
metabolic, to epinephrine in asthmatic, eczematous, and normal subjects, 117 (Abst.)
of patients with "idiopathic" obstructive pulmonary disease and "allergic" obstructive bronchitis to prednisone, *26* (Abst.)
primary immune, to *Listeria monocytogenes*, effect of cytotoxic agents on, *45* (Abst.)
respiratory, in subhuman primates with immediate type hypersensitivity, 47 (Abst.)
in two groups of anergic patients to transfer of leukocytes from sensitive donors, *14* (Abst.)
Responsiveness, un-, of peripheral lymphocytes to phytohemagglutinin stimulation, 101 (Abst.)
Reticuloendothelial blockade produced by antilymphocyte serum, *6* (Abst.)
Rh erythroblastosis fetalis, possible graft-versus-host reaction after intrauterine transfusion for, *24* (Abst.)
Rheumatic fever following streptococcal vaccination, *8* (Abst.)
Rhinitis, allergic, bronchial asthma and, in an entire community, Tecumseh, Michigan, prospective observations on incidence, 102 (Abst.)
influenza, in ferrets, symptomatic therapy by topical application of compounds (Haff), 163

S

Salbutamol and isoproterenol: double-blind trial to compare bronchodilator and cardiovascular activity, *44* (Asbt.)
Saliva, parotid, dilute solution and, quantitation of immunoglobulins in, by electroimmunodiffusion and single radial diffusion, 128 (Abst.)
Sampler, Andersen, simplified application to study of airborne fungus particles (Solomon), 1
intermittent rotoslide, improved shielding device for: swing-shield (Raynor and Ogden), 329
Savignac, Raymond J., 356 (Obit.)
Schonlein-Henoch syndrome: report of two patients with recurrent impairment of renal function, *48* (Abst.)
Schwartz, Emanuel, 357 (Obit.)
Sclerosis, multiple, in vitro synthesis of IgG by cells from cerebrospinal fluid in patient with, *46* (Abst.)
Seborrheic dermatitis, amelioration by replacement of fifth component of complement (C5), 110 (Abst.)
type, and familial disorder of fifth component of complement, further studies on nature, 111 (Abst.)
Secretions, external, antibodies to ragweed in, 106 (Abst.)
nasal, and serum of ragweed-sensitive patients, effect of immunotherapy of IgE antibodies on, 106 (Abst.)
parotid, and serum from ragweed-sensitive individuals, hemagglutinating activity in: clinical correlation, 123 (Abst.)
Secretory antibody, nasal, to inhalent allergens in allergic and nonallergic patients, 105 (Abst.)
IgA in serum, *16* (Abst.)
Sensitive donors, response in two groups of anergic patients to transfer of leukocytes from, *14* (Abst.)
grass pollen- and horse dander-, individuals, association of IgE with reaginic activity in sera from (Frick and Ishizaka), 220
ragweed-, individuals, parotid secretions and serum from, hemagglutinating activity in: clinical correlation, 123 (Abst.)
patients, nasal secretions and serum of, effect of immunotherapy on IgE antibodies in, 106 (Abst.)
Sensitivity, allergic, to cockroach, *48* (Abst.)
bronchial, of asthmatic children, to methacholine, effect of live measles vaccine on, 104 (Abst.)
histamine, carbohydrate metabolism and, after beta-adrenergic blockade, effect of agents used in treatment of bronchial asthma on (Townley et al.), 71
Hymenoptera: role of atopy in development of clinical hypersensitivity (Schwartz and Kahn), 87
sting, value of skin tests in treatment of, 120 (Abst.)
leukocyte, clinical symptoms, antigen-binding capacity, and P-K activity, correlations between in longitudinal study of ragweed pollinosis, 109 (Abst.)

Sensitivity—Cont'd
melon and banana, coincident with ragweed pollinosis (Anderson et al.), 310
relative, of methods for measuring airway resistance in asthmatic children, *18* (Abst.)
Serum (sera), antilymphocyte, reticuloendothelial blockade produced by, *6* (Abst.)
factor, active, studies: solar urticaria (Sams), 295
from grass pollen- and horse dander-sensitive individuals, association of IgE with reaginic activity in (Frick and Ishizaka), 220
immunoglobulin concentrations in patients with alcoholic liver disease, *47* (Abst.)
of normal and allergic individuals, IgE concentration in, 108 (Abst.)
from ragweed-sensitive individuals, parotid secretions and, hemagglutinating activity in: clinical correlation, 123 (Abst.)
patients, nasal secretions and, effect of immunotherapy of IgE antibodies in, 106 (Abst.)
secretory IgA in, *16* (Abst.)
of some patients with asthma and bronchitis, deoxyribonucleic acid antibodies in, 113 (Abst.)
Shock, anaphylactic, elicited by topical administration of bacitracin, 7 (Abst.)
Simulium jenningsi (order Diptera), case of asthma caused by, protected by hyposensitization, 103 (Abst.)
Skin allograft survival and lowered maternal immunologic reactivity, *22* (Abst.)
human, fine morphology in dermographism (Cauna and Levine), 266
reactivity to anti-IgE antibody in infants and children, influence of age and atopy on, 124 (Abst.)
wheal and flare, differing patterns in patients allergic to penicillins, 121 (Abst.)
reaginic antibody (IgE), and provocation tests to *Dermatophagoides culinae* and house dust in respiratory allergy, *37* (Abst.)
tests, value in treatment of Hymenoptera sting sensitivity, 120 (Abst.)
Smooth muscle, bronchial, effect of corticosteroids on beta-adrenergic receptors in, 118 (Abst.)
Solar urticaria: studies of active serum factor (Sams), 295
Spleens of mice sensitized by bacterially or by beta pharmacological blockade, impairment of adenyl cyclase system in, 111 (Abst.)
Sprays, nasal, containing blocking antibody in hay fever, protective effect, 115 (Abst.)
Sputum (sputa) and nasal fluids, human γE in, 105 (Abst.)
Sputum (sputa)—Cont'd
from asthmatic children, protein concentrations in: albumin, lactoferrin, γA, and γG, *40* (Abst.)
Status asthmaticus: bicarbonate therapy and its complication, 104 (Abst.)
Steroid-dependent asthmatic patients, adrenal function in, 130 (Abst.)
chronic, successful initiation of alternate day prednisone in, 109 (Abst.)
resistance in asthma, changing, 131 (Abst.)
side effects, delayed hypersensitivity responses, control of disease and, evaluation: alternate-day prednisone therapy, *13* (Abst.)
Stimulation, antigen, double, of histamine release from human leukocytes, 127 (Abst.)
Sting(s), Hymenoptera, nonfatal results in third-degree anaphylaxis from (Barnard), 92
sensitivity, value of skin tests in treatment of, 120 (Abst.)
Streptococcal vaccination, rheumatic fever following, *8* (Abst.)
Suesserman, Henry, 64 (Obit.)
Swing-shield: improved shielding device for intermittent rotosilde sampler (Raynor and Ogden), 329
Syncope in children following epinephrine, *35* (Abst.)
Syncytial virus, respiratory, neutralizing activity in nasal secretions following natural infection, *29* (Abst.)
Syndrome of immunoglobulin deficiency and pernicious anemia: study of ten cases, *20* (Abst.)
Schonlein-Henoch: report of two patients with recurrent impairment of renal function, *48* (Abst.)
Syphilis, treated late: immunoglobulin class of antibodies reactive with *Treponema pallidum*, *32* (Abst.)

T

Telangiectasia, ataxia-, immunoglobulin E deficiency in, *22* (Abst.)
Test(s), Coombs, positive, penicillin-induced, in newborn, *27* (Abst.)
cross-match, positive, significance in kidney transplantation, *5* (Abst.)
provocation, reaginic antibody (IgE), and skin, to *Dermatophagoides culinae* and house dust in respiratory allergy, *37* (Abst.)
pulmonary function, comparative study with: maximum expiratory flow volume in patients with lung disease, *13* (Abst.)
skin, value in treatment of Hymenoptera sting sensitivity, 120 (Abst.)
Tetracycline, fixed-drug eruption to: report of case, *19* (Abst.)
Thermophilic actinomycetes, precipitins against extracts of, in patients with bagassosis: bagassosis, *22* (Abst.)

XUM

Thymic alymphoplasia with XX/XY lymphoid chimerism to probable maternal-fetal transfusion, *15* (Abst.)
Thymocyte, anti-human-, equine, gamma-globulin, antigen-induced immunological tolerance to, in man, 7 (Abst.)
Thymus, human, immunoglobulin synthesis in vitro by: comparison of myasthenia gravis and normal thymus, *46* (Abst.)
Timothy pollen fractions in treatment of hay fever: clinical and immunological response to small and higher molecular weight fractions (Malley and Perlman), 14
Tissues of parasite infected rats, reagin-forming cells in, 123 (Abst.)
Topical application of compounds, symptomatic therapy of influenza rhinitis in ferrets by (Haff), 163
Transfusion, intrauterine, for Rh erythroblastosis fetalis, possible graft-versus-host reaction after, *24* (Abst.)
maternal-fetal, probable, thymic alymphoplasia with XX/XY lymphoid chimerism secondary to, *15* (Abst.)
Transplant recipients, human, antibody response in, to antilymphocytic globulin in human transplant recipients, 113 (Abst.)
Transplantation, kidney, significance of positive cross-match test in, *5* (Abst.)
of allogenic marrow, treatment of lymphopenic hypogammaglobulinemia and bone marrow aplasia by, *24* (Abst.)
Transplanted human heart, rejection: indexes of recognition and problems in prevention, *14* (Abst.)
Tree pollen antigens, immunologic study, 120 (Abst.)
Treponema pallidum, immunoglobulin class of antibodies reactive with: treated late syphilis, *32* (Abst.)
Trophoblast, human, surface mucin of, *19* (Abst.)

U

Urinary epinephrine, decreased plasma free fatty acids and, in bronchial asthma, *2* (Abst.)
Urticaria and atopic dermatitis, levels in: immunoglobulin E in dermatoses, *43* (Abst.)
cold, acquired, associated with cryoglobulinemia and allergic cutaneous vasculitis, immunologic studies in case, 122 (Abst.)
further studies, 121 (Abst.)
patients with, healthy subjects and, cutaneous reactions to kallikrein, bradykinin, and histamine in, *10* (Abst.)
solar: studies of active serum factor, (Sams), 295
Urticarial hypersensitivity to penicillin, mechanisms of clinical desensitization in (Fellner et al.), 55 (Brief communication)

V

Vaccine, bacterial, hyposensitization with, in infectious asthma, 10 (Abst.)
measles, live, effect on bronchial sensitivity of asthmatic children to methacholine, 105 (Abst.)
Vaccination, streptococcal, rheumatic fever following, *8* (Abst.)
Varicella, prevention by zoster immune globulin, *15* (Abst.)
Vasculitis, allergic cutaneous, cryoglobulinemia and, immunologic studies in case of acquired cold urticaria associated with, 122 (Abst.)
Virus infection, attenuated mumps, acquisition of delayed hypersensitivity following, *32* (Abst.)
respiratory syncytial, neutralizing activity in nasal secretions following natural infection, *29* (Abst.)

W

Wheal and flare skin reactivity, differing patterns in patients allergic to penicillins, 121 (Abst.)
Wheat intolerance, immunochemical studies of selected subjects with (Heiner et al.), 333

Z

Zoster immune globulin, prevention of varicella by, *15* (Abst.)

Subject index*

A

Acetic acid for quantitative gel radial immunodiffusion determination (Kaufman), 122 (Brief communication)

Acetylcholine, increased bronchial response to, and diminished metabolic and eosinopenic responses to epinephrine in asthma, correlation between (Makino et al.), 178

Acid(s), acetic, for quantitative gel radial immunodiffusion determination (Kaufman), 122 (Brief communication)

amino, in asthma, orally administered, failure of adrenergic response to (Marschke), 103

E-aminocaproic, hereditary angioedema treated with, *35* (Abst.)

Adenovirus vaccines, live and inactivated: clinical evaluation of efficacy in prevention of acute respiratory disease, *39* (Abst.)

Adrenergic aerosols, asthma induced by (Reisman), 162

blockade, beta-, or *Bordetella pertussis* vaccine, reduced effect of epinephrine on circulating eosinophils after, and in asthma (Reed et al.), 90

response to orally administered amino acids in asthma, failure (Marschke), 103

Adrenocorticotropic hormone: duration of action of new synthesis depot-ACTH, *29* (Abst.)

preparation, immunologic responses to, in bronchial asthma and rheumatoid arthritis (Muranaka et al.), 138

Aerosol(s), adrenergic, asthma induced by (Reisman), 162

and subcutaneous administration, comparison of epinephrine excretion after (Hoehne et al.), 336

Agammaglobulinemia, idiopathic "acquired," clinical, serologic, and leukocyte function studies on patients with, and families, *21* (Abst.)

lymphoproliferative lesions in congenital thymic aplasia associated with, *19* (Abst.)

Allergen(s) challenge, bronchial, with disodium cromoglycate and thiazinamium, protection tests on (Booij-Noord et al.), 1

Allergen(s)—Cont'd

inhaled, nephrotic syndrome associated with, *2* (Abst.)

Allergenic fractions in biological materials, new method for determining distribution: its application to grass pollen extracts (Marsh et al.), 107

Allergic alveolitis in malt workers, *28* (Abst.)

aspergillosis, pulmonary, *18* (Abst.)

bronchial asthma, activity of salivary muramidase in, *10* (Abst.)

bronchopulmonary aspergillosis: characterization of antibodies and results of treatment (Slavin et al.), 150

studies of dual antibody response in (Goldstein and Yokoyama), 340

contact dermatitis from Frullania and Compositae: role of sesquiterpene lactones, *34* (Abst.)

from nystatin, *43* (Abst.)

granulomatosis with massive gastric involvement, *36* (Abst.)

ragweed-, subjects, IgE antibodies in nasal secretions of (Tse et al.), 352

reactions to drugs, fundamental concepts on, *11* (Abst.)

due to plague vaccine (Reisman), 49

rhinitis, nasal secretion eosinophilia in children with, *26* (Abst.)

Allergy Foundation of America (deGara, Henriques, and Furbush), 63 (Correspondence)

Allograft(s) rejection, acute cardiac, in man, participation of antibodies in, *6* (Abst.)

renal, long-term, immunofluorescent examination of biopsies from, *22* (Abst.)

Allotransplantation, renal, in man, humoral antibodies in, *15* (Abst.)

Alveolar damage, goblet cell metaplasia, and myocardial infarction: pathological findings in respiratory failure, *20* (Abst.)

Alveolitis, allergic, in malt workers, *28* (Abst.)

American Academy of Allergy: Historian's report, 56

Amino acids in asthma, orally administered, failure of adrenergic response to (Marschke), 103

Aminocaproic, E-, acid, hereditary angioedema treated with, *35* (Abst.)

*July, pp. 1-64; August, pp. 65-126; September, pp. 127-196; October, pp. 197-256; November, pp. 257-320; December, pp. 321-382.

Abstracts: July, pp. *1-8*; August, pp. *9-16*; September, pp. *17-24*; October, pp. *25-32*; November, pp. *33-40*; December, pp. *41-48*.

XUM

Aminophylline, intravenously administered, pharmacologic effects in asthmatic children, *10* (Abst.)
Ampicillin, occupational dermatitis from: contact dermatitis, *2* (Abst.)
Angioedema, hereditary, treated with E-aminocaproic acid, *35* (Abst.)
and urticaria, *27* (Abst.)
Announcements, 195, 256
Antibody(ies) and antigens, application of protein-bacteriophage conjugates in detection, *30* (Abst.)
antinucleolar: frequency and diagnostic association, *45* (Abst.)
characterization, and results of treatment: allergic bronchopulmonary aspergillosis (Slavin et al.), 150
humoral, in renal allotransplantation in man, *15* (Abst.)
IgE, in nasal secretions of ragweed-allergic subjects (Tse et al.), 352
participation in acute cardiac allograft rejection in man, *6* (Abst.)
penicilloyl-specific IgG, studies in man, *47* (Abst.)
phenacetin, cross-reactive with autoimmune erythrocyte antibody, *14* (Abst.)
production, effect of human chorionic gonadotropin on, *4* (Abst.)
rabbit homocytotropic: unique rabbit immunoglobulin analogous to human IgE, *12* (Abst.)
response, dual, studies of, in allergic bronchopulmonary aspergillosis, (Goldstein and Yokoyama), 340
test, soluble antigen fluorescent, for serodiagnosis of *Mycobacterium tuberculosis* infection, *13* (Abst.)
Antigen(s), antibodies and, application of protein-bacteriophage conjugates in detection, *30* (Abst.)
-binding capacity, clinical symptoms, leukocyte sensitivity, and Prausnitz-Küstner activity, correlations between in longitudinal study of ragweed pollinosis (Melam et al.), 292
fluorescent antibody test, soluble, for serodiagnosis of *Mycobacterium tuberculosis* infection, *13* (Abst.)
high dose, demonstration of inflammatory activity of supernatant of hypersensitive lymph node cells incubated with, *5* (Abst.)
Antigenicity of house dust extract, immunochemical evaluation of (May et al.), 73
Antilymphocyte serum, influence on skin histamine in mice, *44* (Abst.)
Antinucleolar antibodies: frequency and diagnostic association, *45* (Abst.)
Antitrypsin, α-, deficiency, homozygous and heterozygous, screening for, *24* (Abst.)
deficiency, hereditary alpha-1, masquerading as asthma, emphysema with (Makino et al.), 40
Aortic valve homografts, tolerance to, in man (Zeitz and Van Arsdel), 216
Aplasia, congenital thymic, associated with agammaglobulinemia, lymphoproliferative lesions in, *19* (Abst.)
establishment of immunological competence in child with, by graft of fetal thymus, *48* (Abst.)
Arrhythmias, cardiac, resulting from tracheal suctioning, *5* (Abst.)
Arthritis, rheumatoid, bronchial asthma and, immunologic responses to adrenocorticotropic hormone preparation in (Muranaka et al.), 138
Aspergillosis, allergic bronchopulmonary: characterization of antibodies and results of treatment (Slavin et al.), 150
studies of dual antibody response in (Goldstein and Yokoyama), 340
pulmonary allergic, *18* (Abst.)
Aspermatogenesis, immunologically induced, in white mouse, part II (Malkiel et al.), 321
Aspirin, immunologic studies on (Yurchak et al.), 245
Asthma admissions and deaths at Children's Hospital of Pittsburgh from 1935 to 1968, review (Palm et al.), 257
asymptomatic, mild bronchitis and, gas exchange abnormalities in, *42* (Abst.)
allergic bronchial, activity of salivary muramidase in, *10* (Abst.)
bronchial, associated with intestinal parasites, *2* (Abst.)
cockroach sensitivity in children with, *35* (Abst.)
and rheumatoid arthritis, immunologic responses to adrenocorticotropic hormone preparation in (Muranaka et al.), 138
significance of regional pulmonary function changes in, *29* (Abst.)
chronic, oral versus inhaled corticosteroid for, *45* (Abst.)
correlation between increased bronchial response to acetylcholine and metabolic and eosinopenic responses to epinephrine in (Makino et al.), 178
cough syncope in children with, *23* (Abst.)
early ventilation-perfusion changes in (Novey et al.), 221
emphysema with hereditary alpha-1 antitrypsin deficiency masquerading as (Makino et al.), 40
failure of adrenergic response to orally administered amino acids in (Marschke), 103
diethylcarbamazine citrate (Hetrazan) in treatment of (Benner and Lowell), 29
induced by adrenergic aerosols (Reisman), 162
reduced effect of epinephrine on circulating eosinophils in, and after beta-adrenergic blockade or *Bordetella pertussis* vaccine (Reed et al.), 90
Asthmatic children, pharmacologic effects of intravenously administered aminophylline in, *10* (Abst.)

Asthmatic children—Cont'd
presence of γE in nasal washings and sputum from (Ishizaka and Newcomb), 197
sleep patterns: all-night electroencephalographic studies (Kales et al.), 300
subjects, response to bronchodilator in, as assessed by pulmonary function tests (Sobol et al.), 65
Asthmaticus, status, hypovolemia in, *42* (Abst.)
Atopic dermatitis and psoriasis, decreased cutaneous reactions to kallikrein in patients with, *26* (Abst.)
traits, study of occurrence in patients with keratoconus (Lowell and Carroll), 32
Atrophy, local, following triamcinolone injection, *48* (Abst.)
"Autoallergic" hepatitis, *16* (Abst.)
Autoimmune erythrocyte antibody, phenacetin antibody cross-reactive with, *14* (Abst.)

B

Bacteriophage, protein-, conjugates: application in detection of antibodies and antigens, *30* (Abst.)
Bartlett, Lester L., 196 (Obit.)
Beta-adrenergic blockade or *Bordetella pertussis* vaccine, reduced effect of epinephrine on circulating eosinophils after, and in asthma (Reed et al.), 90
Biological materials, new method for determining distribution of allergenic fractions in: its application to grass pollen extracts (Marsh et al.), 107
Biopsies from long-term renal allografts, immunofluorescent examination of, *22* (Abst.)
Blood cells, white, from tuberculin-positive persons, specific migration inhibition: in vitro detection of tuberculin hypersensitivity in man, *38* (Abst.)
small volume, procedures for immunochemical study of histamine release from leukocytes with (May et al.), 12
Bordetella pertussis-treated mouse, eosinophil leukocyte responses and hypersensitivity reactions in (Cohen et al.), 205
vaccine, reduced effect of epinephrine on circulating eosinophils in asthma and after beta-adrenergic blockade or (Reed et al.), 90
Bronchial allergen challenge with disodium cromoglycate and thiazinamium, protection tests on (Booij-Noord et al.), 1
asthma, allergic, activity of salivary muramidase in, *10* (Abst.)
associated with intestinal parasites, *2* (Abst.)
cockroach sensitivity in children with, *35* (Abst.)
Bronchial asthma—Cont'd
and rheumatoid arthritis, immunologic responses to adrenocorticotropic hormone preparation in (Muranaka et al.), 138
significance of regional pulmonary function changes in, *29* (Abst.)
response to acetylcholine, increased, and diminished metabolic and eosinopenic responses to epinephrine in asthma, correlation between (Makino et al.), 178
Bronchiolitis, epidemic, due to respiratory syncytial virus, double-blind trial of prednisolone in, *7* (Abst.)
Bronchitis, mild, and asymptomatic asthma, gas exchange abnormalities in, *42* (Abst.)
Bronchodilator, response to in asthmatic subjects, as assessed by pulmonary function tests (Sobol et al.), 65
Bronchopulmonary aspergillosis, allergic: characterization of antibodies and results of treatment (Slavin et al.), 150
studies of dual antibody response in (Goldstein and Yokoyama), 340
helminthosporiosis, *45* (Abst.)
Burkitt lymphoma cells, delayed cutaneous hypersensitivity reactions to autologous extracts of, *37* (Abst.)

C

Carbromal, positive antihuman globulin test in patients receiving, *38* (Abst.)
Cardiac allograft rejection, acute, in man, participation of antibodies in, *6* (Abst.)
arrhythmias resulting from tracheal suctioning, *5* (Abst.)
Cartilage-hair hypoplasia, chronic neutropenia and abnormal cellular immunity in, *20* (Abst.)
Cell(s), Burkitt lymphoma, delayed cutaneous hypersensitivity reactions to autologous extracts of, *37* (Abst.)
hypersensitive lymph node, supernatant of, incubated with high dose of antigen, demonstration of inflammatory activity of, *5* (Abst.)
malignant melanoma, autologous extracts of, cutaneous hypersensitivity reactions to, *11* (Abst.)
metaplasia, goblet, alveolar damage, and myocardial infarction: pathological findings in respiratory failure, *20* (Abst.)
sputum, examination, *34* (Abst.)
white blood, from tuberculin-positive persons, specific migration inhibition: in vitro detection of tuberculin hypersensitivity in man, *38* (Abst.)
Cellular hypersensitivity, organ-specific, serum immunoglobulins and, in ulcerative colitis and Crohn's disease, *31* (Abst.)

XUM

Cellular—Cont'd
immunity, abnormal, and chronic neutropenia in cartilage-hair hypoplasia, *20* (Abst.)
Chorionic gonadotropin, human, effect on antibody production, *4* (Abst.)
Circulatory sensitized lymphocytes in Graves' disease, *38* (Abst.)
Cirrhosis, Indian childhood, immunological picture in, *8* (Abst.)
Citrate, diethylcarbamazine (Hetrazan), failure in treatment of asthma (Benner and Lowell), 29
Cockroach sensitivity in children with bronchial asthma, *35* (Abst.)
Cold urticaria: immunologic studies, *46* (Abst.)
Colitis, ulcerative, and Crohn's disease, serum immunoglobulins and organ-specific cellular hypersensitivity in, *31* (Abst.)
Compositae and Frullania, allergic contact dermatitis from: role of sesquiterpene lactones, *34* (Abst.)
Congenital thymic aplasia associated with agammaglobulinemia, lymphoproliferative lesions in, *19* (Abst.)
establishment of immunological competence in child with, by a graft of fetal thymus, *48* (Abst.)
Contact dermatitis, allergic, from Frullania and Compositae: role of sesquiterpene lactones, *34* (Abst.)
from nystatin, *43* (Abst.)
occupational dermatitis from ampicillin, *2* (Abst.)
due to optical whitener in washing powders, *43* (Abst.)
prevalence of hand eczema and other dermatoses, *27* (Abst.)
primary irritant dermatitis, new facts and old concepts, *3* (Abst.)
Coproantibodies, milk, in diarrheal stools, clinical nonspecificity, *39* (Abst.)
Correspondence, 63
Corticosteroid(s), extemporaneous formulation, for topical usage, *27* (Abst.)
oral versus inhaled, for chronic asthma, *45* (Abst.)
Cough syncope: case presentation and review (Aaronson et al.), 359 (Brief communication)
in children with asthma, *23* (Abst.)
Crohn's disease, ulcerative colitis and, serum immunoglobulins and organ-specific cellular hypersensitivity in, *31* (Abst.)
Cromoglycate, disodium, and thiazinamium, protection tests on bronchial allergen challenge with (Booij-Noord et al.), 1
Cutaneous hypersensitivity reactions to autologous extracts of malignant melanoma cells, *11* (Abst.)
delayed, to autologous extracts of Burkitt lymphoma cells, *37* (Abst.)
reactions, decreased, to kallikrein in patients with atopic dermatitis and psoriasis, *26* (Abst.)

D

Deaths, asthma admissions and, at Children's Hospital of Pittsburgh from 1935 to 1968, review (Palm et al.), 257
Dermatitis, allergic contact, from Frullania and Compositae: role of sesquiterpene lactones, *34* (Abst.)
from nystatin, *43* (Abst.)
atopic, and psoriasis, decreased cutaneous reactions to kallikrein in patients with, *26* (Abst.)
contact: occupational dermatitis from ampicillin, *2* (Abst.)
due to optical whitener in washing powders, *43* (Abst.)
prevalence of hand eczema and other dermatoses, *27* (Abst.)
primary irritant dermatitis, new facts and old concepts, *3* (Abst.)
Dermatoses, other, hand eczema and, prevalence: contact dermatitis, *27* (Abst.)
Dermographia, wheezing, and hyperhistaminemia, postexercise, *30* (Abst.)
Dextran, study of three untoward reactions to (Kohen et al.), 309 (Brief communication)
Diarrheal stools, clinical nonspecificity of milk coproantibodies in, *39* (Abst.)
Diethylcarbamazine citrate (Hetrazan), failure in treatment of asthma (Benner and Lowell), 29
Diffusion, single radial, electroimmunodiffusion and, comparison of sensitivity in quantitation of immunoglobulins in dilute solution (Salvaggio et al.), 326
Disease, acute respiratory, clinical evaluation in prevention: live and inactivated adenovirus vaccines, *39* (Abst.)
Crohn's, ulcerative colitis and, serum immunoglobulins and organ-specific cellular hypersensitivity in, *31* (Abst.)
Graves', circulatory sensitized lymphocytes in, *38* (Abst.)
Disodium cromoglycate and thiazinamium, protection tests on bronchial allergen challenge with (Booij-Noord et al.), 1
Drugs, allergic reactions to, fundamental concepts on, *11* (Abst.)
Dust extract, house, immunochemical evaluation of antigenicity (May et al.), 73

E

Eczema, hand, and other dermatoses, prevalence: contact dermatitis, *27* (Abst.)
Electroencephalographic studies, all-night: sleep patterns of asthmatic children (Kales et al.), 300
Electroimmunodiffusion and single radial diffusion, comparison of sensitivity in quantitation of immunoglobulins in dilute solution (Salvaggio et al.), 326

Emphysema with hereditary alpha-1 antitrypsin deficiency masquerading as asthma (Makino et al.), 40
Enzyme washing powders, epidemiological study of workers producing, *3* (Abst.)
Eosinopenic and metabolic responses to epinephrine in asthma, increased bronchial response to acetylcholine and, correlation between (Makino et al.), 178
Eosinophil(s), circulating, reduced effect of epinephrine on, in asthma and after beta-adrenergic blockade or *Bordetella pertussis* vaccine (Reed et al.), 90
leukocyte responses and hypersensitivity reactions in *Bordetella pertussis*-treated mouse (Cohen et al.), 205
Eosinophilia, nasal secretion, in children with allergic rhinitis, *26* (Abst.)
Epinephrine, diminished metabolic and eosinopenic responses to, increased bronchial response to acetylcholine and, in asthma, correlation between (Makino et al.), 178
excretion, comparison after aerosol and subcutaneous administration (Hoehne et al.), 336
reduced effect on circulating eosinophils in asthma and after beta-adrenergic blockade or *Bordetella pertussis* vaccine (Reed et al.), 90
Erythrocyte antibody, phenacetin antibody cross-reactive with, *14* (Abst.)
Excretion, epinephrine, comparison after aerosol and subcutaneous administration (Hoehne et al.), 336
Exercise, post-, hyperhistaminemia, dermographia, and wheezing, *30* (Abst.)
Extract(s), autologous, of malignant melanoma cells, cutaneous hypersensitivity to, *11* (Abst.)
grass pollen, application of new method for determining distribution of allergenic fractions in biological materials to (Marsh et al.), 107
house dust, immunochemical evaluation of antigenicity, (May et al.), 73

F

Fetal thymus, establishment of immunological competence in child with congenital thymic aplasia by graft of, *48* (Abst.)
Fluorescent antibody test, soluble antigen, for serodiagnosis of *Mycobacterium tuberculosis* infection, *13* (Abst.)
Food sensitivity, clinical and immunological perspectives in (Goldstein and Heiner), 270
Frauenberger, George S., 319 (Obit.)
Frullania and Compositae, allergic contact dermatitis from: role of sesquiterpene lactones, *54* (Abst.)

G

Gamma E (γE), presence in nasal washings and sputum from asthmatic children (Ishizaka and Newcomb), 197
globulin synthesis in first month of life, *22* (Abst.)
Gas exchange abnormalities in mild bronchitis and asymptomatic asthma, *42* (Abst.)
Gastric involvement, massive, allergic granulomatosis with, *36* (Abst.)
Gel radial immunodiffusion determination, quantitative, acetic acid for (Kaufman), 122 (Brief communication)
Globulin, gamma, synthesis in first month of life, *22* (Abst.)
test, positive antihuman, in patients receiving carbromal, *38* (Abst.)
Glucose, effects of compounds which inhibit lymphocyte stimulation on utilization of, by leukocytes (May et al.), 21
Goblet cell metaplasia, alveolar damage, and myocardial infarction: pathological findings in respiratory failure, *20* (Abst.)
Gonadotropin, human chorionic, effect on antibody production, *4* (Abst.)
Graft of fetal thymus, establishment of immunological competence in child with congenital thymic aplasia by, *48* (Abst.)
Granulomatosis, allergic, with massive gastric involvement, *36* (Abst.)
Grass pollen extracts, application of new method for determining distribution of allergenic fractions in biological materials to (Marsh et al.), 107
Graves' disease, circulatory sensitized lymphocytes in, *38* (Abst.)

H

Hair, cartilage-, hypoplasia, chronic neutropenia and abnormal cellular immunity in, *20* (Abst.)
Halothane, lymphocyte stimulation induced by, in patients with hepatitis following exposure to halothane, *44* (Abst.)
Hand eczema and other dermatoses, prevalence: contact dermatitis, *27* (Abst.)
Harsh, George Frederic, 318 (Obit.)
Heller, Joseph E., 126 (Obit.)
Helminthosporiosis, bronchopulmonary, *45* (Abst.)
Hepatitis, "autoallergic," *16* (Abst.)
immune complexes in, *30* (Abst.)
lymphocyte stimulation induced by halothane, in patients with, following exposure to halothane, *44* (Abst.)
Hereditary alpha-1 antitrypsin deficiency masquerading as asthma, emphysema with (Makino et al.), 40
angioedema treated with E-aminocaproic acid, *35* (Abst.)
Heterozygous and homozygous α-antitrypsin deficiency, screening for, *24* (Abst.)

XUM

Hetrazan (diethylcarbamazine citrate), failure in treatment of asthma (Benner and Lowell), 29
Histamine release from leukocytes with small volume of blood, procedures for immunochemical study of (May et al.), 12
skin, in mice, influence of antilymphocyte serum on, *44* (Abst.)
Historian's report: American Academy of Allergy, 56
Homocytotropic antibody, rabbit: unique rabbit immunoglobulin analogous to human IgE, *12* (Abst.)
Homografts, aortic valve, tolerance to, in man (Zeitz and Van Arsdel), 216
Homozygous and heterozygous α-antitrypsin deficiency, screening for, *24* (Abst.)
Hormone, adrenocorticotropic: duration of action of new synthesis depot-ACTH, *29* (Abst.)
preparation, adrenocorticotropic, immunologic responses to, in bronchial asthma and rheumatoid arthritis (Muranaka et al.), 138
Humoral antibodies in renal allotransplantation in man, *15* (Abst.)
Hyperhistaminemia, dermographia, and wheezing, postexercise, *30* (Abst.)
Hypersensitive lymph node cells, supernatant of, incubated with high dose of antigen, demonstration of inflammatory activity of, *5* (Abst.)
Hypersensitivity, delayed, to penicillin: clinical significance and hyposensitization after therapy, *4* (Abst.)
organ-specific cellular, serum immunoglobulins and, in ulcerative colitis and Crohn' disease, *31* (Abst.)
pneumonitis, animal model (Fink et al.), 156
reactions, cutaneous, to autologous extracts of malignant melanoma cells, *11* (Abst.)
delayed cutaneous, to autologous extracts of Burkitt lymphoma cells, *37* (Abst.)
eosinophil leukocyte responses and, to *Bordetella pertussis*-treated mouse (Cohen et al.), 205
responses in monkeys: sensitization to human serum and nonacceptance of reagin (Feinberg et al.), 231
tuberculin delayed, depression by live attenuated mumps virus, *16* (Abst.)
in man, in vitro detection: specific migration inhibition of white blood cells from tuberculin-positive persons, *38* (Abst.)
type I, and skin, *18* (Abst.)
Hypoplasia, cartilage-hair, chronic neutropenia and abnormal cellular immunity in, *20* (Abst.)
thymic, and thyroid dysfunction, *23* (Abst.)
Hyposensitization, clinical significance and, after therapy: delayed hypersensitivity to penicillin, *4* (Abst.)
Hypovolemia in status asthmaticus, *42* (Abst.)

I

Immune complexes in hepatitis, *30* (Abst.)
Immunity, abnormal cellular, and chronic neutropenia, in chronic cartilage-hair hypoplasia, *20* (Abst.)
Immunochemical evaluation of antigenicity of house dust extract (May et al.), 73
study of procedures for histamine release from leukocytes with small volume of blood, (May et al.), 12
Immunodiffusion determination, quantitative gel radial, acetic acid for (Kaufman), 122 (Brief communication)
Immunofluorescent examination of biopsies from long-term renal allografts, *22* (Abst.)
Immunoglobulin(s) development during first year of life, 7 (Abst.)
in dilute solution, comparison of sensitivity of electroimmunodiffusion and single radial diffusion in quantitation (Salvaggio et al.), 326
E (IgE) in antibodies in nasal secretions of ragweed-allergic subjects (Tse et al.), 352
human, unique rabbit immunoglobulin analogous to: rabbit homocytotropic antibody, *12* (Abst.)
immunoglobulin levels during childhood with special regard to, *31* (Abst.)
myeloma, clinical aspects, *6* (Abst.)
G (IgG) antibody, penicilloyl-specific, studies in man, *47* (Abst.)
levels during childhood, with special regard to IgE, *31* (Abst.)
serum, and organ-specific cellular hypersensitivity in ulcerative colitis and Crohn's disease, *31* (Abst.)
unique rabbit, analogous to human IgE: rabbit homocytotropic antibody, *12* (Abst.)
Immunologic(al) and clinical perspectives in food sensitivity (Goldstein and Heiner), 270
competence, establishment in child with congential thymic aplasia by graft of fetal thymus, *48* (Abst.)
picture in Indian childhood cirrhosis, *8* (Abst.)
responses to adrenocorticotropic hormone preparation in bronchial asthma and rheumatoid arthritis (Muranaka et al.), 138
studies on aspirin (Yurchak et al.), 245
cold urticaria, *46* (Abst.)
Immunologically induced aspermatogenesis in white mouse, part II (Malkiel et al.), 321
Indian childhood cirrhosis, immunological picture in, *8* (Abst.)
Infarction, myocardial, goblet cell metaplasia, and alveolar damage: pathological findings in respiratory failure, *20* (Abst.)
Infection, *Mycobacterium tuberculosis*, soluble antigen fluorescent antibody test for serodiagnosis of, *13* (Abst.)

Injection, triamcinolone, local atrophy following, *48* (Abst.)
Insect, stinging, allergy (Reisman), 254 (Edit.)
Insulin allergy and insulin resistance (Dolovich et al.), 127
Intestinal parasites, bronchial asthma associated with, *2* (Abst.)

K

Kallikrein, decreased cutaneous reactions to, in patients with atopic dermatitis and psoriasis, *26* (Abst.)
Keratoconus, study of occurrence of atopic traits in patients with (Lowell and Carroll), 32
Kessler, Joseph, 320 (Obit.)
Kral, Franz, 316 (Obit.)

L

Lactones, sesquiterpene, role: allergic contact dermatitis from Frullania and Compositae, *34* (Abst.)
Lesions, lymphoproliferative, in congenital thymic aplasia associated with agammaglobulinemia, *19* (Abst.)
Leukocyte(s), effects of compounds which inhibit lymphocyte stimulation on utilization of glucose by (May et al.), 21
  function studies, clinical, serologic and, on patients with idiopathic "acquired" agammaglobulinemia and families, *21* (Abst.)
  histamine release from, with small volume of blood, procedures for immunochemical study of (May et al.), 12
  responses, eosinophil, and hypersensitivity reactions in *Bordetella pertussis*-treated mouse (Cohen et al.), 205
  sensitivity, antigen-binding capacity, clinical symptoms, and Prausnitz-Küstner activity, correlations between in longitudinal study of ragweed pollinosis (Melam et al.), 292
Lobe syndrome, obstructive, *36* (Abst.)
Lymph node cells, hypersensitive, supernatant of, incubated with high dose of antigen, demonstration of inflammatory activity of, *5* (Abst.)
Lymphocyte(s), circulatory sensitized, in Graves' disease, *38* (Abst.)
  stimulation induced by halothane in patients with hepatitis following exposure to halothane, *44* (Abst.)
    on utilization of glucose by leukocytes, effects of compounds which inhibit (May et al.), 21
Lymphoma cells, Burkitt, delayed cutaneous hypersensitivity reactions to autologous extracts of, *37* (Abst.)
Lymphoproliferative lesions in congenital thymic aplasia associated with agammaglobulinemia, *19* (Abst.)

M

Macrophage-thymocyte interactions, autologous (Siegel), 190 (Brief communication)
Malt workers, allergic alveolitis in, *28* (Abst.)
Matheson, Abe, 315 (Obit.)
Melanoma cells, malignant, autologous extracts of, cutaneous hypersensitivity reactions to, *11* (Abst.)
Metabolic and eosinopenic responses to epinephrine in asthma, increased bronchial response to acetylcholine and, correlation between (Makino et al.), 178
Metaplasia, goblet cell, alveolar damage, and myocardial infarction: pathological findings in respiratory failure, *20* (Abst.)
Military, allergy practice in (Criep), 63 (Correspondence)
Milk coproantibodies in diarrheal stools, clinical nonspecificity, *39* (Abst.)
Mumps virus, live attenuated, depression of tuberculin delayed hypersensitivity by, *16* (Abst.)
Muramidase, salivary, activity in allergic bronchial asthma, *10* (Abst.)
Mycobacterium tuberculosis infection, soluble antigen fluorescent antibody test for serodiagnosis of, *13* (Abst.)
Myeloma, IgE, clinical aspects, *6* (Abst.)
Myocardial infarction, goblet cell metaplasia, and alveolar damage: pathological findings in respiratory failure, *20* (Abst.)

N

Nasal resistance, cyclical changes in, *23* (Abst.)
  secretion(s) eosinophilia in children with allergic rhinitis, *26* (Abst.)
    of ragweed-allergic subjects, IgE antibodies in (Tse et al.), 352
  washings and sputum from asthmatic children, presence of γE in (Ishizaka and Newcomb), 197
Naterman, Hyman Louis, 364 (Obit.)
Nephrotic syndrome associated with inhaled allergens, *2* (Abst.)
Neutropenia, chronic, and abnormal cellular immunity in cartilage-hair hypoplasia, *20* (Abst.)
Nystatin, allergic contact dermatitis from, *43* (Abst.)

Obituaries
  Bartlett, Lester L., 196
  Frauenberger, George S., 319
  Harsh, George Frederic, 318
  Heller, Joseph E., 126
  Kessler, Joseph, 320
  Kral, Franz, 316
  Matheson, Abe, 315

XUM

Obituaries—Cont'd
Naterman, Hyman Louis, 364
Paddock, Royce, 64
Schloss, Lewis J., 196
Sidi, Edwin, 317
Spielman, Aaron D., 125
Tzank, Arnault, 317
Vinocur, Joseph L., 315
Obstructive lobe syndrome, *36* (Abst.)
Optical whitener in washing powders, contact dermatitis due to, *43* (Abst.)
Organ-specific cellular hypersensitivity, serum immunoglobulins and, in ulcerative colitis and Crohn's disease, *31* (Abst.)

P

Paddock, Royce, 64 (Obit.)
Pancreatitis as adverse reaction to salicylazosulfapyridine, *11* (Abst.)
Parasites, intestinal, bronchial asthma associated with, *2* (Abst.)
Penicillin, delayed hypersensitivity to: clinical significance and hyposensitization after therapy, *4* (Abst.)
Penicilloyl-specific IgG antibody in man, studies, *47* (Abst.)
Perfusion, ventilation-, changes, early, in asthma (Novey et al.), 221
Phenacetin antibody cross-reactive with autoimmune erythrocyte antibody, *14* (Abst.)
Plague vaccine, allergic reactions due to (Reisman), 49
Pneumonitis, hypersensitivity, animal model (Fink et al.), 156
Pollen extracts, grass, application of new method for determining distribution of allergenic fractions in biological materials to (Marsh et al.), 107
Pollinosis, ragweed, correlations between clinical symptoms, leukocyte sensitivity, antigen-binding capacity, and Prausnitz-Küstner activity in longitudinal study of (Melam et al.), 292
Prausnitz-Küstner activity, clinical symptoms, leukocyte sensitivity, antigen-binding capacity and, correlations between in longitudinal study of ragweed pollinosis (Melam et al.), 292
Prednisolone, double-blind trial in epidemic bronchiolitis due to respiratory syncytial virus, *7* (Abst.)
Protein-bacteriophage conjugates: application in detection of antibodies and antigens, *30* (Abst.)
Psoriasis, atopic dermatitis and, decreased cutaneous reactions to kallikrein in patients with, *26* (Abst.)
Pulmonary allergic aspergillosis, *18* (Abst.)
function changes, regional, in bronchial asthma, significance, *29* (Abst.)
screening tests of, *36* (Abst.)
tests, response to bronchodilator in asthmatic subjects as assessed by (Sobol et al.), 65

R

Radial diffusion, single, electroimmunodiffusion and, comparison of sensitivity in quantitation of immunoglobulins in dilute solution (Salvaggio et al.), 326
Ragweed-allergic subjects, IgE antibodies in nasal secretions of (Tse et al.), 352
pollinosis, correlations between clinical symptoms, leukocyte sensitivity, antigen-binding capacity, and Prausnitz-Küstner activity in longitudinal study of (Melam et al.), 292
Rheumatoid arthritis, bronchial asthma and, immunologic responses to adrenocorticotropic hormone preparation in (Muranaka et al.), 138
Rhinitis, allergic, nasal secretion eosinophilia in children with, *26* (Abst.)
Reaction(s), adverse, to salicylazosulfapyridine pancreatitis as, *11* (Abst.)
allergic, to drugs, fundamental concepts on, *11* (Abst.)
due to plague vaccine (Reisman), 49
cutaneous hypersensitivity, to autologous extracts of malignant melanoma cells, *11* (Abst.)
decreased cutaneous, to kallikrein in patients with atopic dermatitis and psoriasis, *26* (Abst.)
delayed cutaneous hypersensitivity, to autologous extracts of Burkitt lymphoma cells, *37* (Abst.)
to dextran, untoward, study of three (Kohen et al.), 309 (Brief communication)
hypersensitivity, eosinophil leukocyte responses and, to *Bordetella pertussis*-treated mouse (Cohen et al.), 205
Reagin, nonacceptance of, sensitization to human serum and: hypersensitivity responses in monkeys (Feinberg et al.), 231
Renal allografts, long-term, immunofluorescent examination of biopsies from, *22* (Abst.)
allotransplantation in man, humoral antibodies in, *15* (Abst.)
Resistance, insulin, insulin allergy and (Dolovich et al.), 127
nasal, cyclical changes in, *23* (Abst.)
Respiratory disease, acute, clinical evaluation in prevention: live and inactivated adenovirus vaccines, *39* (Abst.)
failure, pathological findings in: goblet cell metaplasia, alveolar damage, and myocardial infarction, *20* (Abst.)
syncytial virus, double-blind trial of prednisolone in epidemic bronchiolitis due to, *7* (Abst.)
Response(s), adrenergic, to orally administered amino acids in asthma, failure (Marschke), 103
bronchial, to acetylcholine, increased, and diminished, metabolic and eosinopenic responses to epinephrine in asthma, correlation between (Makino et al.), 178

Response(s)—Cont'd
to bronchodilator in asthmatic subjects as assessed by pulmonary function tests (Sobol et al.), 65
dual antibody, studies of, in allergic bronchopulmonary aspergillosis (Goldstein and Yokoyama), 340
eosinophil leukocyte, and hypersensitivity reactions to *Bordetella pertussis*-treated mouse (Cohen et al.), 205
hypersensitivity, in monkeys: Sensitization to human serum and nonacceptance of reagin (Feinberg et al.), 231
immunologic, to adrenocorticotropic hormone preparation in bronchial asthma and rheumatoid arthritis (Muranaka et al.), 138

S

Salicylazosulfapyridine, pancreatitis as adverse reaction to, *11* (Abst.)
Schloss, Lewis J., 196 (Obit.)
Secretion(s), nasal, eosinophilia, in children with allergic rhinitis, *26* (Abst.)
of ragweed-allergic subjects, IgE antibodies in (Tse et al.), 352
Sensitivity, cockroach, in children with bronchial asthma, *35* (Abst.)
of electroimmunodiffusion and single radial diffusion, comparison in quantitation of immunoglobulins in dilute solution (Salvaggio et al.), 326
food, clinical and immunological perspectives in (Goldstein and Heiner), 270
leukocyte, antigen-binding capacity, clinical symptoms, and Prausnitz-Küstner activity, correlations between in longitudinal study of ragweed pollinosis (Melam et al.), 292
Sensitization to human serum and nonacceptance of reagin: hypersensitivity responses in monkeys (Feinberg et al.), 231
Sensitized lymphocytes, circulatory, in Graves' disease, *38* (Abst.)
Serum, antilymphocyte, influence on skin histamine in mice, *44* (Abst.)
human, sensitization to, and nonacceptance of reagin: hypersensitivity responses in monkeys (Feinberg et al.), 231
immunoglobulins and organ-specific cellular hypersensitivity in ulcerative colitis and Crohn's disease, *31* (Abst.)
Sidi, Edwin, 317 (Obit.)
Skin histamine in mice, influence of antilymphocyte serum on, *44* (Abst.)
type I hypersensitivity and, *18* (Abst.)
Sleep patterns of asthmatic children: all-night electroencephalographic studies (Kales et al.), 300
Spielman, Aaron D., 125 (Obit.)
Sputum cells, examination, *34* (Abst.)
and nasal washings from asthmatic children, presence of γE in (Ishizaka and Newcomb), 197
Status asthmaticus, hypovolemia in, *42* (Abst.)
Stools, diarrheal, clinical nonspecificity of milk coproantibodies in, *39* (Abst.)
Subcutaneous and aerosol administration, comparison of epinephrine excretion after (Hoehne et al.), 336
Syncope, cough: case presentation and review (Aaronson et al.), 359 (Brief communication)
in children with asthma, *23* (Abst.)
Syncytial virus, respiratory, double-blind trial of prednisolone in epidemic bronchiolitis due to, *7* (Abst.)
Syndrome, nephrotic, associated with inhaled allergens, *2* (Abst.)
obstructive lobe, *36* (Abst.)

T

Test(s), positive antihuman globulin, in patients receiving carbromal, *38* (Abst.)
protection, on bronchial allergen challenge with disodium cromoglycate and thiazinamium (Booij-Noord et al.), 1
pulmonary function, response to bronchodilator in asthmatic subjects as assessed by (Sobol et al.), 65
screening, of pulmonary function, *36* (Abst.)
soluble antigen fluorescent antibody, for serodiagnosis of *Mycobacterium tuberculosis* infection, *13* (Abst.)
Thiazinamium, disodium cromoglycate and, protection tests on bronchial allergen challenge with (Booij-Noord et al.), 1
Thymic aplasia, congenital, associated with agammaglobulinemia, lymphoproliferative lesions in, *19* (Abst.)
establishment of immunological competence in child with, by graft of fetal thymus, *43* (Abst.)
hypoplasia and thyroid dysfunction, *23* (Abst.)
Thymocyte, macrophage-, interactions, autologous (Siegel), 190 (Brief communication)
Thymus, fetal, establishment of immunological competence in child with congenital thymic aplasia by graft of, *43* (Abst.)
Thyroid dysfunction, thymic hypoplasia and, *23* (Abst.)
Tracheal suctioning, cardiac arrhythmias resulting from, *5* (Abst.)
Triamcinolone injection, local atrophy following, *48* (Abst.)
Tuberculin delayed hypersensitivity, depression by live attenuated mumps virus, *16* (Abst.)
hypersensitivity in man, in vitro detection: specific migration inhibition of white blood cells from tuberculin-positive persons, *38* (Abst.)
Tzank, Arnault, 317 (Obit.)

XUM

U

Ulcerative colitis and Crohn's disease, serum immunoglobulins and organ-specific cellular hypersensitivity in, *31* (Abst.)
Urinary tract, lower, allergy of, *19* (Abst.)
Urticaria and angioedema, *27* (Abst.)
cold, immunologic studies, *46* (Abst.)

V

Vaccine(s), *Bordetella pertussis*, reduced effect of epinephrine on circulating eosinophils in asthma and after beta-adrenergic blockade or (Reed et al.), 90
live and inactivated adenovirus: clinical evaluation of efficacy in prevention of acute respiratory disease, *39* (Abst.)
plague, allergic reactions due to (Reisman), 49
Valve homografts, aortic, tolerance to, in man (Zeitz and Van Arsdel), 216
Ventilation-perfusion changes, early, in asthma (Novey et al.), 221
Vinocur, Joseph L., 315 (Obit.)
Virus, live attenuated mumps, depression of tuberculin delayed hypersensitivity by, *16* (Abst.)
respiratory syncytial, double-blind trial of prednisolone in epidemic bronchiolitis due to, 7 (Abst.)

W

Washing powders, contact dermatitis due to optical whitener in, *43* (Abst.)
Wheezing, hyperhistaminemia, dermographia and, postexercise, *30* (Abst.)
White blood cells from tuberculin-positive persons, specific migration inhibition: in vitro detection of tuberculin hypersensitivity in man, *38* (Abst.)

XUM
